UNEP Global Mercury Partnership

Dear Sir/Madam,

Protection of health and environment from the consequences of release of mercury, able to badly affect these goods, shall be aim of all our doing and is a motivating factor of our daily work.

Due to this we would like to join the UNEP Global Mercury Network and provide our support, experience and services as a partner.

We clearly commit ourselves to the goal of the UNEP.

Regarding the already initiated partnership areas, we will especially be able to contribute the areas 'mercury air transport and fate research' as well as 'mercury releases from coal combustion'.

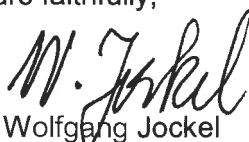

Meanwhile over decades we are experienced on emission monitoring, air quality measurements, air dispersion modelling and testing suitability of continuously monitoring systems for air pollutants.

By this we can provide deep knowledge on quantification of mercury release to the atmosphere and the dispersion of such emissions.

Also in case there might be any data gaps identified, we may provide our services by application most modern testing methods like mercury emission sampling according EN 13211 and analysing according EN 1483.

We will appreciate joining the UNEP network on this topic of global mercury and looking forward to hearing from you.

Yours faithfully,

Dr. Wolfgang Jockel

Managing Director
