Geneva, Switzerland

To the membership committee:

I am writing to express Brooks Rand Instruments' desire to join the UNEP Global Mercury Partnership. We are a scientific instrument manufacturer specializing in high sensitivity systems for mercury analysis. We have a long history of providing instruments to the mercury research, monitoring, and regulatory community. 25 years ago, we produced the world's first commercial cold vapor atomic fluorescence detector for mercury and five years ago, we produced the first commercial automated methylmercury analysis system.

We produce equipment for measuring mercury in water, soil, plant and animal tissues, air, manufactured products, wastewater, and many other matrices. We can therefore offer the expertise and equipment necessary to advance knowledge and understanding in all seven partnership areas. We are strong supporters of efforts to control mercury releases and protect human health in the United States and work with a number of government agencies to advance these causes. We are excited to join UNEP's global effort to bring protection from mercury exposure to people and ecosystems around the world. We are pleased to offer our knowledge, services, and relationships where possible to advance the goals of the partnership.

We look forward to hearing from you.

Sincerely,

Joel Creswell, Ph.D.
Research Scientist

UNEP GLOBAL MERCURY PARTNERSHIP REGISTRATION FORM*

PARTNERSHIP AREA

Please check partnership areas that your organization intends to contribute to:

- artisanal and small scale gold mining
- mercury cell chlor alkali production
- mercury air transport and fate research
- mercury in products
- mercury releases from coal combustion
- mercury waste management
- mercury supply and storage

Please indicate in your support letter how your organization intends to contribute to each of the indicated partnership areas.
