# \* Micro-site

A microsite is a separately promoted part of a larger Web site. A microsite is designed to meet separate objectives and has a separate Web address (or Uniform Resource Locator) as its home page. Typically, a microsite resides on the same Web server and reflects the branding and overall visual design of the larger site with which it is associated.

# **SOCIAL MEDIA HIGHLIGHTS**

# World Wildlife Day

# 3 March

# WorldWildlifeDay

#WorldwildlifeDay recorded a total of 65,567 tweets and a reach of 130M users. #SeriousAboutWildlifeCrime recorded a total of 25,083 tweets and a reach of 62,5M users.

UNEP sent out **26** *tweets*, **3** posts and a photo album on *Facebook*, and shared two images in *Instagram*.

GWA's Ian Somerhalder, Gisele Bundchen & Don Cheadle supported the campaign.

# World Conference on Disaster Risk Reduction

# 14 – 18 March

#### **#WCDRR**

From March 16-20 #WCDRR recorded a total of **26,306** tweets and a total reach of **48M** users. UNEP sent out 38 tweets, 8 FB posts and 4 photos on instagram, shared a social media pack with RIO's and UN agencies and did live-tweeting from the conference.

RT - retweet

FB – facebook

# **SOCIAL MEDIA ANALYSIS**

#### **TWITTER**

March saw a rise in number of tweets, favorites, RT's and replies and an overall higher engagement rate than last month (Feb was 1.35%, March 1.5%). This suggest that a higher tweet rate might increase engagement, and tweet frequency should be advanced next month to test this thesis. However, the average retweet rate was 52 RTs per post a decrease by 26% compared to last month (was 70), which could suggest otherwise. Increasing RT rate (how to) should be a focus area for next month.

Follower increase remained steady compared to last month although slightly under the average for the past six months (March was 13,674, average 14,156,5)

#### What worked:

- + Fact driven and strong content (positive/negative)
- + Emotional content
- + Visual content: Visual posts / infographics / videos give good returns
- + RT's of fact and visual solid content from other credible accounts

#### What did not work:

- + Text only posts (should be further reduced)
- + General announcements (of e.g. events necessary but more context often needed)
- + 'Talking heads' visuals and videos

## **FACEBOOK**

The number of posts on FB was up this month, and although the overall reach was slightly lower than Feb figures, the engagement rate for March was higher than last month (4.4% compared to 4% last month). As on twitter this could suggest that a higher post rate could increase engagement rates. The average post per day have been two for a while, and the team should experiment with 3-4 posts daily next month.

#### What worked:

- + Fact driven and strong content (positive/negative)
- + Emotional content
- + 'Big' environment news (eg agreement in Sendai)
- + World Wildlife Day visuals
- + Solar Impulse news
- + Children's Painting contest
- + Hot topics: Forests, Disaster Risk Reduction, Ecosystems, Clean Energy (SI), Climate change

## What did not work:

- + General call outs to join International Days (IWD/Water Day)
- + Ready-made content for IWD saw low engagement rates
- + Promotion of this months UNEP reports
- + Timing: should be timed to peak hours

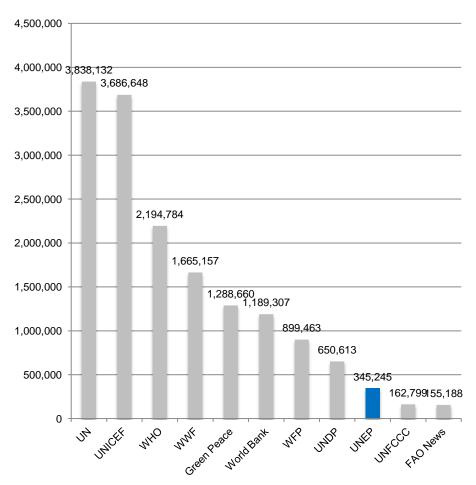

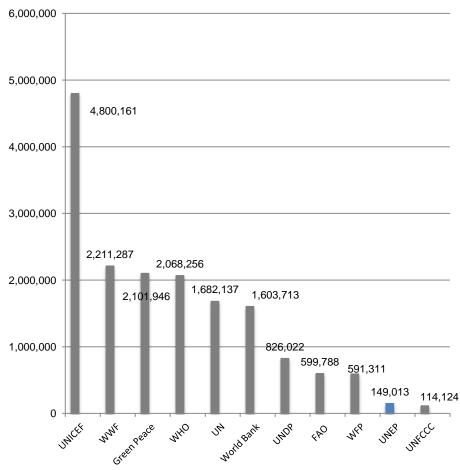

# **SOCIAL MEDIA BENCHMARKS**

# TWITTER OVERVIEW

# **UNEP RETWEET RATE**

@UNEP's average retweet rate was **52** RTs per post in March, a decrease by 26% compared to last month (was 70).

## **KEY FACTS**

## Best day of the month

Monday, March 3rd UNEP recorded 291,805 Impressions

# Key data on this day

- World Wildlife Day (WWD)
- Wangari Maathai Day
- 26 tweets sent
- Content Input from UNODC on illegal wildlife trade
- UNEP joined & promoted WWD Thunderclap campaign

Impressions compared to previous month 10%

Followers compared to previous month 3.6 %

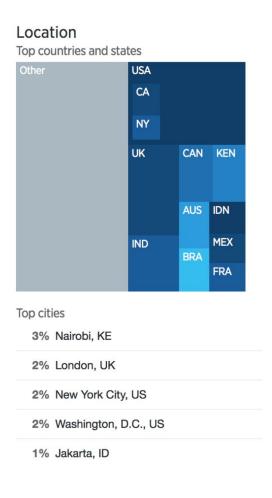

\* Impressions is the potential number of users that saw the tweet. E.g. if you have 2,000 followers and send the same message two times, your reach is 2,000 but impressions is 4,000 - because those 2000 people could potentially have seen the message twice.

Fans on WeChat rising although we continue to lose audience on RenRen (attributed to audience trends - RenRen is now not considered an essential platform to engage on.)

last month

## **WEB**

**Bounce Rate:** The percentage of visitors to a particular website who navigate away from the site after viewing only one page.

**Direct Traffic:** Represents traffic to the web site with no referrer as one of the following: I) the visitor typed the domain name directly into their browser, 2) the visitor bookmarked the site, 3) the visitor clicked on an email, shortcut, or other direct link

**Page Views:** An instance of an Internet user visiting a particular page on a website.

**Referring Domain:** A web site that refers a visitor to your site by linking to it.

**Visitors:** The number of inferred individual people (filtered for spiders and robots), within a designated reporting timeframe, with activity consisting of one or more visits to a site.

**Visits:** An instance of an Internet user visiting a particular page on a website.

## **SOCIAL MEDIA**

**Engagement Rate:** Is the percentage of people who saw a post and liked, shared, clicked or commented on it. Monthly engagement rate can be used as a benchmark to measure how posts perform on a daily/weekly basis.

Eng.Rate = (Engaged users/Reach) \*100

Fans: Users who "like" a particular page

**Followers:** Users who have subscribed to your Twitter updates and will see your Tweets show up in their news stream.

**Replies:** Replies are mentions that start with the @handle of a specific user you're engaging.

**Retweet:** A retweet is when a user shares a post of another user with their followers. Twitter enables this action with their "retweet" button.

Impressions: Is the *potential* number of users that saw the tweet. E.g. if you have 2,000 followers and send the same message two times, your reach is 2,000 but impressions is 4,000 - because those 2000 people could potentially have seen the message twice.

**Reach:** Is the total number of estimated unique Twitter users that saw a tweet from UNEP.

**Tweets:** Any message you send out to your followers.
