13TH MERCURY AND MULTI-POLLUTANT EMISSIONS FROM COAL WORKSHOP

21-23 MAY 2018 KRAKOW, POLAND

We are pleased to announce the MEC13, the 13th Workshop on Multi-pollutant Emissions from Coal, will be held in Krakow, Poland, on the 21-23 May 2018, in the Radisson Blu Hotel.

This workshop pulls together international experts on reducing emissions, including particulates, SO₂, NO_x and mercury, from coal-fired utilities and offers an excellent opportunity to mix with government agencies, regulators, utilities, consultants, equipment suppliers and academia. With the Minamata Convention moving into ratification and new, tighter, emission limits being required within the EU soon, there is no better time to be speaking to colleagues in the industry in Europe.

If you are interested in sponsoring or exhibiting at this event, please contact lesley.sloss@iea-coal.org directly.

We invite you to submit your abstract by 25 January 2018 to lesley.sloss@iea-coal.org and to welcoming you as speaker or participant to Krakow, Poland in May 2018.
