

UN Environment Programme CPR Subcommittee 8 November 2018

France's comments on

South-South Cooperation

France fully subscribes to the comments made by the EU. As a complement, we welcome the proposal of the Secretariat to develop, in full transparency, a UNEP South-South and Triangular Cooperation Strategy based on lessons learnt. We deem the involvement of all in this process is the best way to address many of the expressed concerns. Hence, we will be happy to take an active part to developing that strategy and hope to hear more about it soon. This goes without prejudice to the need for the Secretariat to engage in timely consultations with the member states on emerging initiatives.
