

# Children and Ozzy Ozone

---

Children need to know about ozone depletion and its consequences because for as long as the ozone layer remains depleted, they need to protect themselves from excess UV radiation and practice "safe sun" behaviour.

Also, as everyone with a daughter or son knows, children are important for another reason: they transmit messages and information to adults: their parents, families, and teachers.

For these reasons, UNEP has emphasised children in its Global Awareness Campaign under the Multilateral Fund and has developed a suite of educational and public awareness products aimed at children.

## Ozzy Ozone videos

In this video, Ozzy Ozone and Alberta the Albatross take a voyage of discovery to find out exactly who and what is attacking the ozone layer and how children can play an important role in making a difference. This video is 9 minutes long. It has been shown in 62 countries and has been translated to 22 languages. Airline companies have shown it. Betacam format of this video is available in English, French, and Spanish and it is suggested that the national television channels could diffuse it. The international version of the video is available in case countries wish to translate it into a national language.

## Ozzy Ozone TV spots

Three short public service announcements for television have been produced: "Ozzy and Isabella", "Buy Ozone Friendly Products" and a short advertisement on the Ozzy Ozone video. Betacam videos suitable for broadcasting in English, French, and Spanish are available.

▶ [Ozzy Ozone TV spots](#)

## Ozzy Ozone radio spots

In two 30-second radio spots, Ozzy Ozone is transmitting an urgent message from the stratosphere about the ozone holes over South and North poles. These spots are in English, French, Portuguese and Spanish for national or local radio diffusion.

## Ozzy Ozone Defender of our Planet: Ozzy Goes Farming

This comic book focuses on alternatives to methyl bromide. Ozzy and Zoe Ozone travel around the world with Mona the Monarck butterfly. They observe in every continent how methyl bromide can be replaced with more environmentally friendly alternatives. This booklet is part of a suite of educational materials linked of the global Ozzy Ozone campaign. It is suitable for dissemination in schools as part of a national awareness campaigns.

## Ozzy Ozone Defender of our Planet: Ozzy Goes Island Hopping

Ozzy Goes Island Hopping features ozone depletion and climate change with a special focus on Hydrochlorofluorocarbons (HCFCs). In this story Ozzy and Zoe travel from the stratosphere to visit their friends Alida, the leatherback turtle; Guno, the sand crab and Ronaldo, the red snapper in Suriname to learn about the effects of climate change in small islands and low-lying coastal states.

This publication is a jointly produced by UNEP, UNICEF, UNESCO and Scouts International with participation of the governments of the hosting islands.

## OzonAction Education Pack for Primary Schools

This Pack has been developed by UNEP's Division of Technology, Industry and Economics OzonAction Programme as part of the organisation's mandate as an Implementing Agency of the Multilateral Fund for the Implementation of the Montreal Protocol on Substances that Deplete the Ozone Layer.

The OzonAction Education Pack contains an entire teaching and learning programme, based on basic knowledge, practical skills and participation, for students to learn about concrete and simple solutions to protect the ozone layer and safely enjoy the sun.

---

## OzonAction Education Pack for Secondary Schools

This book, designed for teachers of secondary schools, represents the start of a success story. It is an example of what happens if everyone tries to do something positive to help solve an environmental problem - in this case, the depletion of the Earth's protective ozone layer.

The Teacher's book which is like a mini-Montreal Protocol guide book catered for young people aged between 13-16 years, aims to raise awareness and encourage the active participation of young people in the debate on ozone depletion, its potential effects on them, the place in which they live and the planet. It also offers children a chance to design their own projects for taking action.

---

## Ozzy Ozone Game

The Ozzy Ozone board game is as much informative as fun. The colourful game in a form of "snakes and ladders" initiates the children to Ozzy's world and gives a lot of information of the issue as well as examples of good actions to take and actions to avoid. The game is downloadable and can be printed on A3 sized paper.

► [Ozzy Game in English](#) | [French](#) | [Spanish](#) |

► [Play Ozzy Game on-line](#) or [download e-game](#)

### How to download game

1. Click on '[download e-game](#)' then save the zipped folder to your hard disk.
2. Click 'Open' then 'Extract all files'.
3. Click 'OK' or 'Next' .
4. Open the folder "ozzygame" then click on 'play-game' to enter the game.
5. The game will open in your web browser.
6. Have fun!

## Ozzy Ozone Games - Indonesia

These Ozzy Ozone games were developed to educate children on ozone layer protection , were produced by the Government of Indonesia in cooperation with UNEP and supported by Sinergi Management Consulting & Capacity Building, UNDP, and dm Brands Consultants.

▶ [Click here to enter the games](#)

## Ozzy Ozone website

On 16 September 2005 in Mauritius, UNEP launched a new website for children providing information on issues concerning the ozone layer, as well as an interactive section that includes educational games. The website will be available at . This website will also be available on CD upon request.

## Decade Of Education For Sustainable Development

The United Nations General Assembly on 20 December 2002 adopted a resolution establishing a UN Decade of Education for Sustainable Development (DESD). The resolution designates the 10-year period as 2005-2014. The DESD offers an opportunity to advance progress made in human resource development, education and training to support sustainable futures. The Decade aims to promote education as the basis for a sustainable human society, and to strengthen international cooperation towards the development of innovative policies, programmes and practices of Education for Sustainable Development.
