NETTLAP PUBLICATION No. 2
1993

PREFACE

In 1986, UNEP published a *Directory of Tertiary Institutions Offering Environmental Education and Training Courses in Asia and Pacific Region*. This was followed in 1990 by the *Directory of Personnel and Experts on Environmental Education in Asia and the Pacific Region*. Compilation and publication of this information were requested by the participants attending a Regional Meeting of Experts held in Bangkok, Thailand in 1985.

The present Directory combines, updates and expands upon these earlier volumes. The larger number of individuals and institutions listed, and the wide range of activities included in the Directory, reflect the upsurge in environmental education and training activities undertaken by tertiary institutions in the region. Through their formal degree programmes, shorter courses, research, consulting, advising and awareness raising these tertiary institutions, and the individual members of staff, are making critically important contributions to the development of human resources and appropriate technologies. These are the key areas of the capacity building required to equip developing countries with the ability to pursue their goals of social and economic development while at the same time protecting the environment and conserving natural resources.

This Directory contains a listing of the institutional and individual members of the *Network for Environmental Training at Tertiary Level in Asia and the Pacific (NETTLAP)*, an activity supported by UNEP and implemented by its Regional Office for Asia and the Pacific (UNEP/ROAP). Membership of NETTLAP is open to key tertiary-level environmental institutions and educators in the Asia-Pacific region. Those seeking membership, and hence a listing in this Directory, were requested to complete a survey form. This was the method used to provide the information listed for each institution and individual. Thus the compilers and UNEP cannot accept responsibility for the accuracy and completeness of the entries. Opportunities to amend, update and add entries will be given to both institutions and individuals - these are outlined on the following page.

In addition to providing as a listing of institutional and individual members of NETTLAP, the Directory will also serve numerous other important purposes. For example, it can be used to identify experts who can advise governments and industry on diverse topics with environmental linkages. Given its anticipated widespread use, the Directory is also being made available in machine readable form on diskette. This will facilitate distribution, access and updating.

Compilation and preparation of the Directory has involved numerous individuals and organizations. The NETTLAP National Focal Points and Specialist Focal Points made an invaluable contribution to the identification of relevant institutions and individuals in their respective countries. The cooperation and assistance of the Environmental Education and Training Unit of UNEP is also acknowledged. The Regional Coordinating Unit of the East Asian Seas Action Plan (RCU/EAS) also assisted with the compilation and editing.

AVAILABILITY OF DIRECTORY

While supplies last, printed copies of the Directory are available from:

NETTLAP Coordinator
UNEP/ROAP
UN Building
Rajdamnern Avenue, Bangkok 10200, Thailand

An expanded and regularly updated version of the Directory is also available in machine readable form, on diskette or by electronic mail. The former can be obtained by enclosing an IBM formatted DS.HD diskette with a request sent to the address given above. The software supplied with the diskette is menu driven. This facilitates extraction of individual entries according to such sort keys as country, major professional field, NGO affiliations and education/training interests. The InterNet E-mail address is:

smtplink%NETTLAP_at_UNESCAP1@un.org

UPDATING THE DIRECTORY

The availability of this Directory in a machine readable form provides the opportunity for, and the benefits of, regular updating. This includes the revision of current entries plus the addition of new institutional and individual members of NETTLAP. Contact NETTLAP at the above address.

In addition, NETTLAP intends to expand the information contained in the present Directory. For example, the enhanced version will include information on the professional experience of individual members, including cooperation with UNEP and other UN organizations. Such information will assist those wishing to identify experienced educators and trainers who have the potential to make significant intellectual and technical contributions to their activities.

DISCLAIMER

The compilers of this Directory, and UNEP, will not accept responsibility for the accuracy and completeness of the information provided by individuals and institutions for inclusion in this volume.
