United Nations Secretary-General's Message for International Day for the Preservation of Ozone Layer 16th September, 2001

The battle to repair the ozone layer -- the Earth's protective shield, which filters out harmful levels of sunlight -- has been a positive example for all people and nations who care about preserving the fragile global environment.

The threat posed by the use of certain chemicals was first recognized some 30 years ago, and has been vigorously addressed by governments, scientists, industries, consumers and multilateral organizations, including the United Nations. Meaningful agreements have been reached, and alternative chemicals have been introduced for use in everything from fire-fighting to aerosol cans. If governments continue to implement the provisions of the Vienna Convention for the Protection of the Ozone Layer, and the Montreal Protocol on Substances that Deplete the Ozone Layer and its Amendments, the ozone layer is expected to recover its pre-1980 state by 2050.

However, this is not a foregone conclusion. There is a thriving illegal trade in ozone-damaging substances and other products controlled by the Montreal Protocol. Moreover, new ozone-depleting substances are being developed and marketed that are currently outside the Protocol's control. Such activities must be addressed if we are to guarantee the ozone layer's full repair and recovery.

Experience with the ozone layer suggests that the international community can indeed summon the resources, creativity and political will to address major environmental threats. As we remain vigilant about threats to the ozone layer, let us also address ourselves to the long list of other threats awaiting similar attention.

.....
Please note that the Arabic, Chinese, French, English, Russian and Spanish versions of the message of the UN Secretary-General on the Occasion of the International Day for the Preservation of the Ozone Layer (16 September 2001) is now available @: http://www.unep.org/ozone/ozone_day2001/

Save O₃ur Sky: Protect Yourself, Protect the Ozone Layer

United Nations Environment Programme Division of Technology, Industry, and Economics (UNEP DTIE) OzonAction Programme provides OzoNews as a free service to help keep readers informed about current news relating to ozone depletion and the implementation of the Montreal Protocol. The goal of OzoNews is to provide information, stimulate discussion and promote cooperation in support of compliance with the Montreal Protocol. With the exception of items written by UNEP and occasional contributions solicited from other organizations, the news is sourced from on-line newspapers, journals and websites. The views expressed in articles written by external authors are solely the viewpoints of those authors and do not represent the policy or viewpoint of UNEP. While UNEP strives to avoid inclusion of misleading or inaccurate information, it is ultimately the responsibility of the reader to evaluate the accuracy of any news article in OzoNews. The citing of commercial technologies, products or services does not constitute endorsement of those items by UNEP.
