Subparagraph 10 d) of UNEA Decision 4/2; "[Monitoring and reporting on the implementation of the programme of work and budget and of the resolutions of the Environment Assembly]"

We are in agreement with the web based design monitoring mechanism. Our input is that

1) Monitoring framework to consider tracking cross-cutting issues so that it can support integrated, systems-based approaches to implementation.

2) Rooting of the indicators in the resolutions and relating them to the SDGs to be maintained.

3) Indicators to remain Policy-relevant; consensus-based, and in line with international standards; relevant to all members states and all people; and able to be disaggregated to track progress for all relevant groups.
