

Dear colleagues

Thank you for circulating a revised roadmap for the intersessional work of the AHEG.

We found the seminars very informative but it would be great if you could clarify the following:

1. Is there going to be a forum where members of the expert group can interact? There appears to be a mechanism for the Secretariat to provide information to the members and viceversa, but little opportunity for interaction between members.
2. Is the Paper from the Chair on response options (present in previous iterations of the roadmap) the same as a draft meeting report on the progress, identifying various elements for further discussion is planned to be presented by the Chair of the Bureau mentioned in the introduction section of the current roadmap?
3. Information papers on the different aspects covered by the webinars would be invaluable, similar to what we would expect to receive ahead of an AHEG meeting. Can you set out when we might expect to see papers with the interim and final output from the different work strands?
4. Can you make the powerpoint presentations of the webinars available separately to the recordings already available on the website so we can refer to material contained therein?

Kindest regards,

Julius
