

# Global response options to plastic pollution

EIRIK LINDEBJERG, GLOBAL PLASTIC POLICY MANAGER

WWF

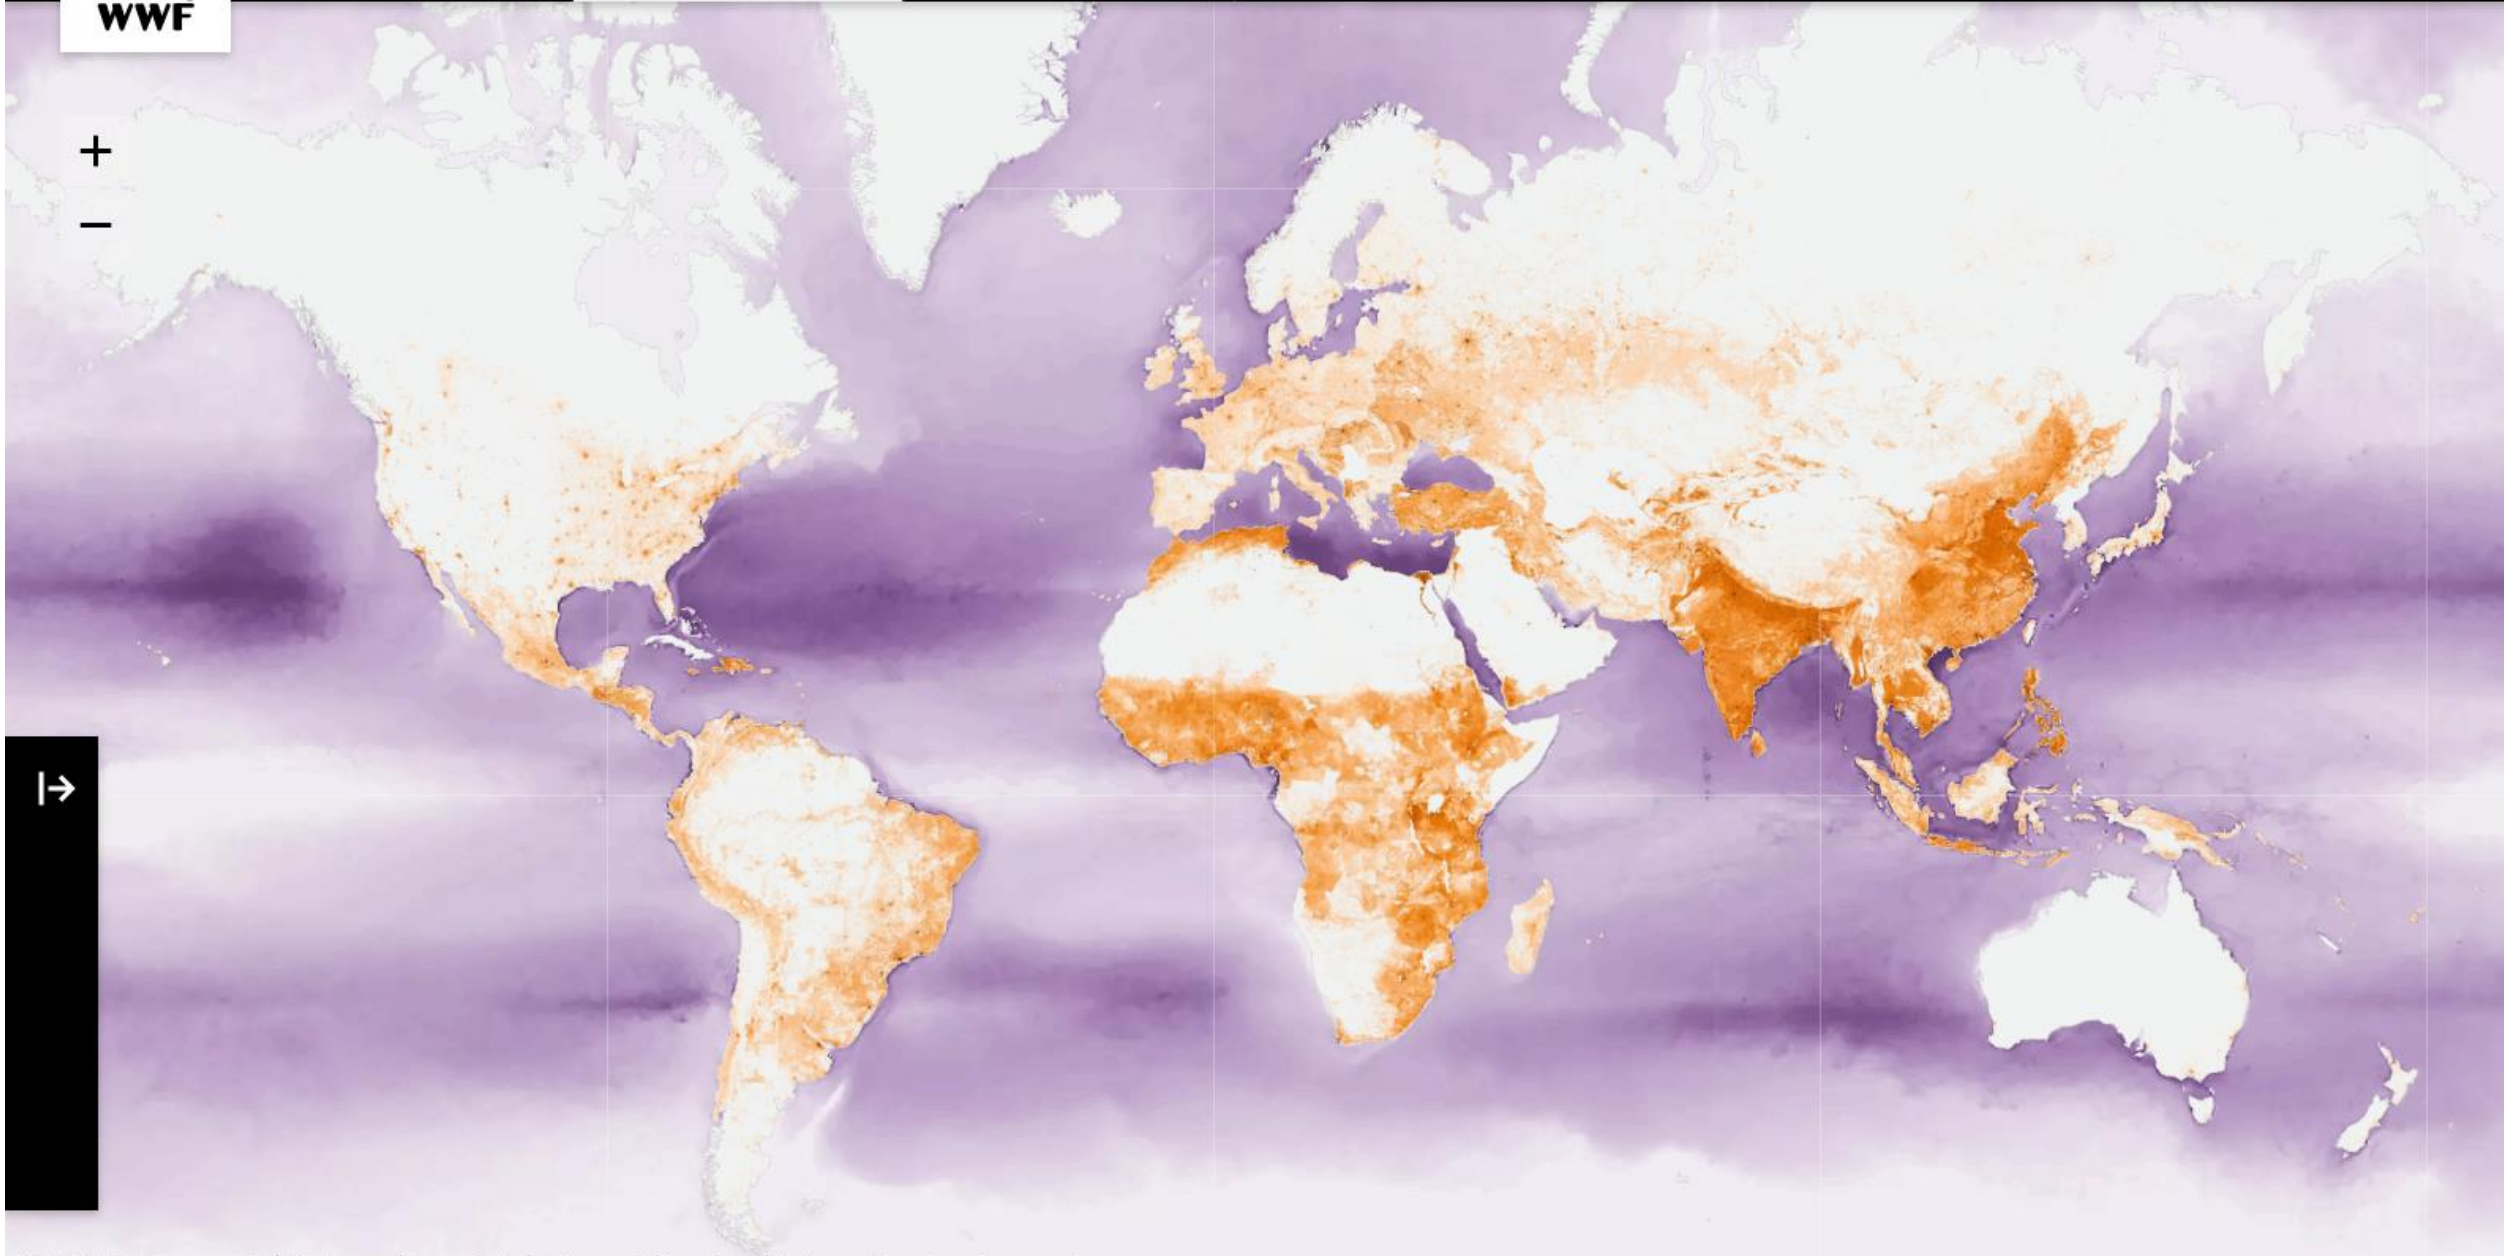

# About WWF

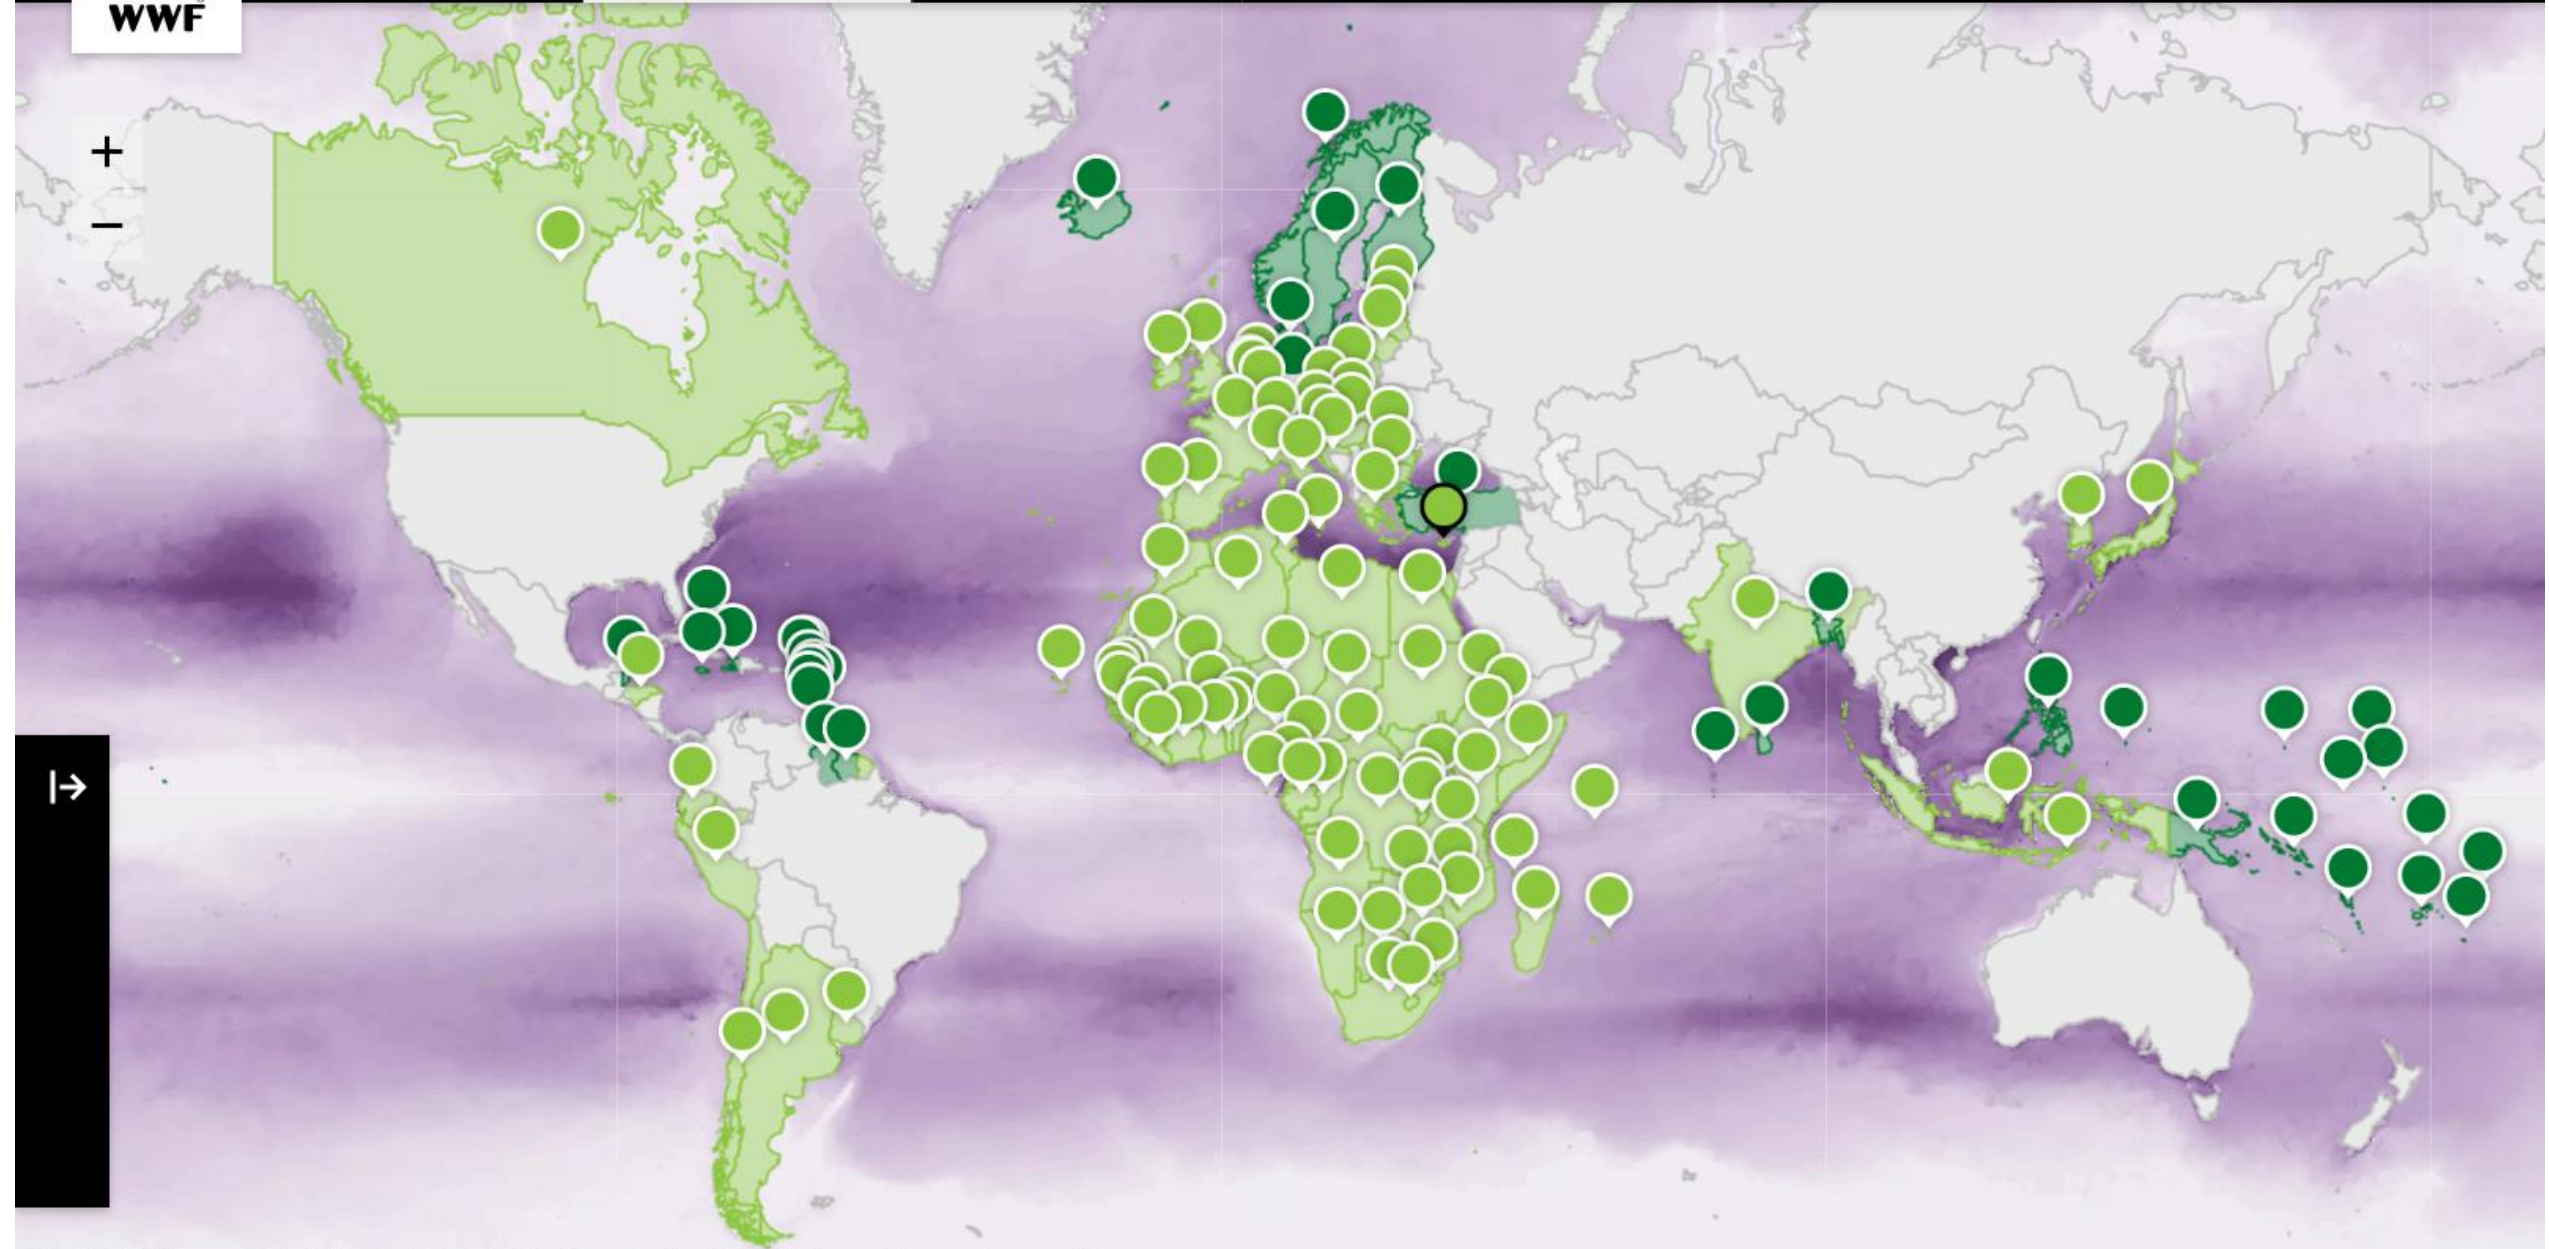

- One of the world's largest environmental NGO
- Presence in more than 100 countries
- WWF works to conserve the world's biological diversity, ensure that the use of renewable natural resources is sustainable and promote the reduction of pollution and wasteful consumption.

# Global recognition of the problem

## Sustainable development goals, target 14.1

By 2025, prevent and significantly reduce marine pollution of all kinds, in particular from land-based activities, including marine debris and nutrient pollution

## UNEA, resolution 3.7

1. *Stresses* the importance of long-term elimination of discharge of litter and microplastics to the oceans and of avoiding detriment to marine ecosystems and the human activities dependent on them from marine litter and microplastics

# GAPS AND CHALLENGES

## 01 NO GLOBAL RULES

Lack of global rules, standards or recommended practices

## 02 NO CLEAR DIRECTION

Lack of global goals, coordination and obligations to follow up

## 03 NO REPORTING

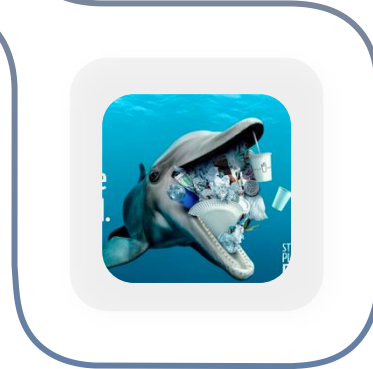

Lack of common reporting, monitoring and review mechanisms and no scientific body to synthesize and advance global knowledge

## 04 NO FINANCIAL MECHANISM

Lack of financial mechanisms for supporting states in their efforts

05

## SIGNIFICANT GAPS IN NATIONAL AND REGIONAL LEGISLATION AND COMMITMENTS

# A New International Legally Binding Agreement

*What could it be?*

- 1 Global goal and national targets implemented in national action plans
- 2 Global architecture to coordinate, report and review
- 3 Intergovernmental panel of experts and harmonized measurement and monitoring
- 4 Global standards and regulations on high risk materials and disposal methods
- 5 Implementation support mechanism.  
*I.e., finance, technology, capacity building.*

	GAPS	ACTION REQUIRED	POTENTIAL TREATY ELEMENT
KNOWLEDGE	<b>PROBLEM-KNOWLEDGE GAP</b> <ul style="list-style-type: none"> <li>• <b>Insufficient scientific knowledge</b> about long-term effects of problem</li> <li>• <b>Lack of reliable data</b> on sources, leakage rates, pathways and concentration levels</li> </ul>	<b>INCREASE KNOWLEDGE OF THE PROBLEM</b> <ul style="list-style-type: none"> <li>• Developing common indicators and methodology for monitoring the problem</li> <li>• Developing a system for regular and reliable collection and analysis of data</li> <li>• Establishing baselines, monitoring changes over time and estimate future trajectories</li> <li>• Feeding results of the scientific research into policy discussions at all levels.</li> </ul>	<b>DEDICATED SCIENTIFIC BODY</b> <ul style="list-style-type: none"> <li>• <b>Monitoring status</b> of the problem</li> <li>• <b>Assessing effects</b> of the problem</li> <li>• Evaluating trajectories to long-term goal</li> <li>• Advising on action required</li> </ul>
	<b>RESPONSE-KNOWLEDGE GAP</b> <ul style="list-style-type: none"> <li>• <b>Poor of overview of policy measures</b> and regulatory interventions</li> <li>• Considerable <b>uncertainty about effectiveness</b> of response measures</li> </ul>	<b>INCREASE KNOWLEDGE OF ABOUT RESPONSE</b> <ul style="list-style-type: none"> <li>• Developing common standards for measurement, reporting and verification</li> <li>• Periodically taking stock of actions and activities on all levels and assessing effectiveness of response options</li> <li>• Monitoring progress towards long-term goal and make necessary adjustments to commitment levels</li> </ul>	<b>MONITORING &amp; REVIEW SYSTEM</b> <ul style="list-style-type: none"> <li>• <b>Annual reports</b> by all parties with information on inventories (leakage data) and status of implementation of national action plans</li> <li>• <b>Comprehensive stocktaking</b>, at 4-5 year intervals, of actions and activities undertaken by States, with a view to assessing effectiveness of response measures on all levels, and to ensuring progress</li> </ul>
RESOURCES	<b>RESOURCE-GAP</b> <ul style="list-style-type: none"> <li>• Insufficient <b>financial resources</b></li> <li>• Lack of <b>technical expertise and support</b></li> <li>• Limited sharing of know-how and best-practices</li> </ul>	<b>INCREASE AVAILABLE RESOURCES</b> <ul style="list-style-type: none"> <li>• Scaling up international aid flows and improving coordination of aid flows (minimizing transaction costs)</li> <li>• Prioritizing the most cost-efficient response options (e.g. through national action plans) and transferring implementation costs to polluters (e.g. through EPR schemes)</li> <li>• Facilitating capacity-building and sharing of know-how, technological innovations and best-practices (e.g. through training programmes and a policy toolkit)</li> </ul>	<b>IMPLEMENTATION SUPPORT ARCHITECTURE</b> <ul style="list-style-type: none"> <li>• <b>A policy toolkit/clearing house</b> mechanism, to facilitate sharing of know-how and best-practices, and to promote cost-efficient response options</li> <li>• <b>A dedicated financial mechanism</b> to support implementation of treaty obligations</li> <li>• <b>A programme for training</b> of technical experts</li> <li>• A support system for research, development and innovation</li> </ul>
LAW	<b>RULES-GAP</b> <ul style="list-style-type: none"> <li>• Lack of agreed and <b>globally applicable rules, standards and obligations</b> for tackling the problem</li> </ul>	<b>AGREE ON A SET OF RULES AND STANDARDS</b> <ul style="list-style-type: none"> <li>• Obligations to develop and periodically update national action plans, to serve as tools for achieving benchmark targets</li> <li>• Certain technical minimum standards and requirements deemed key to achieving the long term goal</li> <li>• Restrictions on certain high-risk substances or products</li> <li>• Explicit bans on certain acts considered to defeat the object and purpose of the treaty</li> </ul>	<b>A SET OF TREATY-BASED OBLIGATIONS</b> <ul style="list-style-type: none"> <li>• <b>Globally agreed minimum standards</b> and requirements</li> <li>• Framework for periodically reviewing and updating the globally applicable norms and standards</li> </ul>

# Are we getting our GLOBAL ACT together?

A growing wave of support for global action.

**Group of Friends to Combat Marine Plastic Pollution** at UNHQ in New York with 55 founding members

**EU Commission** decides to work for a new global agreement on plastic pollution, March 2020

Minister of Environment of **India** calling for a global agreement to be explored, January 2020

Joint AMCEN declaration by **African Ministers of Environment**, November 2019

**The Caribbean, Nordic and Pacific** governments called for a new global agreement through regional heads-of-state declarations, 2019

The world needs a new *binding global agreement* and the adoption of a *negotiation mandate* at UNEA5

MAKING IT HAPPEN AT UNEA5

Thank you!
