Adopt a coastline  
Keep antigua nice

A circular logo with a white background. The text "Adopt a coastline" is written in a blue, cursive font along the top arc. The text "Keep antigua nice" is written in the same font along the bottom arc. In the center of the circle are three blue illustrations: a fish at the top, a sea turtle on the left, and a bird in flight on the right.

## Antigua and Barbuda Waste Recycling Corporation

This organization will contribute to this project by providing expertise, workshop space and utilities and the base material of the shredded plastic. Specifically, it will support the project with in-kind match contribution for:

- Normal commercial rent for housing your operation (600 square feet): US\$6,700 -  
Utilities for a year: US\$5,000
- Supply of shredded waste plastic (10,000 lbs): US\$1,500

The total estimated value of these in-kind contributions is US\$13,200. ABWREC intends to make this contribution from October 2020 till October 2021.

Create the workspace for a simple local recycling and upcycling program at ABWREC

Reuse plastic waste and create new products.

Design and produce usable products from recycled plastic.

The workshop is operated by West Indies Sail Heritage Foundation Inc. in cooperation with Antigua Barbuda Waste Recycling Corporation (ABWREC), Zero Waste Antigua and Barbuda and, Adopt a Coastline.

The workshop will be a site where children and local residents can visit to see the recycling process

Sell the up-cycled products to fund the Ocean Love NO Plastic NO Waste Sailing Days, environmental awareness campaigns and the teaching of sailing skills

## Public urged to participate in 'plastic free' data gathering exercise

Members of the Asia Pacific Waste Consultants company (dressed in blue), alongside representatives of the Ministry of Health, Wellness and the Environment (dressed in white) and Zero Waste Antigua and Barbuda (dressed in green).

By Orville Williams

Residents of Antigua and Barbuda are being urged by the Ministry of Health, Wellness and the Environment, to participate in a data gathering exercise taking place over the next couple of weeks.

The project – called the Plastic Free Waste Island project – will run for three years and is being led by the International Union for Conservation of Nature, Regional Office for Mexico, Central America and the Caribbean (IUCN-ORMACC), with support from the Norwegian Agency for Development Cooperation (NORAD), through the Ministry of Health, Wellness and the Environment.

Australian-based consultancy company, Asia Pacific Waste Consultants (APWC), will be executing the data gathering over the next four weeks, along with the Netherlands-based, Searious Business, and these consultants will be going door-to-door, conducting interviews with households, businesses in the private sector (including hotels) and any other relevant entities who are directly or indirectly associated with plastic waste generation.

Speaking at a press conference yesterday afternoon,

Environment Minister Mollwyn Joseph explained that the project is part of a larger goal to get Antigua and Barbuda to “zero waste”. He implored members of the public to cooperate with the consultants, saying that “what this effort is about, is to give us the data, in order for us to know exactly the volume of waste in Antigua and Barbuda”.

The Minister further explained that this data collection exercise will contribute to the completion of the larger project, with the next phase being extensive planning.

“[It will give us the data to plan how we deal with waste, the type of equipment we need [and] to look deeply into how we are going to use this [waste] material,” he said.

Project manager with APWC, Martina De Marcos, explained that waste collection and sorting will also be a part of the initial phase of the project.

“Here in Antigua and Barbuda, we’re going to be doing interviews, also we’re going to be doing waste collection, and then we’re going to sort the waste that we collect. So, we’re going to be able to know what waste is com-

ing, what type of waste and everything, mainly focusing on plastics, but we’re going to be doing all the characterisation of the waste,” she said.

The interviews in the data gathering exercise will begin today from 10am to 2pm, starting in Crosbies, Mount Pleasant, and Royal Gardens, and continue in the afternoon

from 3.30pm to 6pm in the Barnes Hill and New Winthropes communities.

On Thursday, from 10am to 2pm, the interviews will be done in the Piccadilly and Old Road communities, while Grays Farm, Golden Grove and Golden Grove Extension will be done in the afternoon from 3.30pm to 6pm.
