

BLUE SOLUTIONS

BLUE PLANNING IN PRACTICE

Ecosystem-Based Marine and Coastal Spatial Planning

QUESTIONNAIRE

The following questionnaire is to be filled out by participants of the Marine and Coastal Spatial Planning regional training workshop from COBSEA countries. Please submit your response to Katrin.holmgren@un.org and erick.ross@giz.de by 27 October 2020.

1. How would you describe your understanding regarding the following subjects?

- a. Biodiversity and Biodiversity Conservation Good understanding A little bit Nothing
- b. Ecosystem/ Ecosystem services and functions Good understanding A little bit Nothing
- c. Climate change Good understanding A little bit Nothing
- d. Planning and Management Good understanding A little bit Nothing
- e. Communication/Facilitation Good understanding A little bit Nothing

2. Have you been trained in Marine and/or Coastal Spatial Planning? If yes, please provide details.

.....
.....

3. Do you have any practical experiences and/or responsibilities in Marine and/or Coastal Spatial Planning? If yes, please provide details.

.....
.....

4. Would you be open to sharing these experiences and practical examples on Marine and/or Coastal Spatial Planning from your country in a regional training?

.....
.....

5. Which of the following contents are you most interested in? (sort order from highest (1) to lowest (6))

a. Identification of need for and process design of a spatial management plan	<input type="checkbox"/>
b. Organisation of stakeholder participation	<input type="checkbox"/>
c. Inventory and analysis of current and future conditions in coastal and marine areas	<input type="checkbox"/>
d. Drafting and approving a spatial management plan	<input type="checkbox"/>
e. Implementation and enforcement of a spatial management plan	<input type="checkbox"/>
f. Monitoring, revision and adjustment of a plan	<input type="checkbox"/>

6. Is there any further topic not listed above you would like to deal with in a regional training (i.e. climate change adaptation, sustainable ocean economy)?

.....

7. Do you have particular needs in your country that a regional training could support in order to implement Marine and/or Coastal Spatial Planning in your country?

.....

8. Considering the recommendation of previous projects to develop a community of practice on Marine and/or Coastal Spatial Planning, do you see value in such a community and what should be the most important topics to focus on?

.....
