

MEDITERRANEAN ACTION PLAN

UNITED NATIONS ENVIRONMENT PROGRAMME

BIBLIOGRAPHY ON EFFECTS OF CLIMATIC CHANGE
AND RELATED TOPICS

MAP Technical Reports Series No.29

This volume is the twenty-ninth issue of the Mediterranean Action Plan Technical Report Series.

This series contains selected reports resulting from the various activities performed within the framework of the components of the Mediterranean Action Plan: Pollution Monitoring and Research Programme (MED POL), Blue Plan, Priority Actions Programme, Specially Protected Areas and Regional Oil Combating Centre.

PREFACE

In spite of uncertainties surrounding the predicted climate changes, greenhouse gases seem to have accumulated in the atmosphere to such a level that the changes may have started already and their continuation may now be inevitable.

The environmental problems associated with the potential impact of expected climatic changes may prove to be among the major ones facing the marine environment and adjacent coastal areas, in the near future. Therefore, in line with the Decision of the Fourteen Session of the UNEP Governing Council on "Global climate change"^{1/}, the Oceans and Coastal Areas Programme Activity Centre (OCA/PAC) of UNEP launched and supported a number of activities designed to assess the potential impact of climate changes and to assist the Governments in identification and implementation of suitable response measures which may mitigate the negative consequences of the impact.

In 1987, the Task Teams on Implications of Climate Change were established for six regions covered by the UNEP Regional Seas Programme (Mediterranean, Wider Caribbean, South Pacific, East Asian Seas, South Seas and South-East Pacific).

The initial objective of the Task Teams was to prepare regional overviews and site specific case studies on the possible impact of predicted climate changes on the ecological systems, as well as on the socio-economic structures and activities of their respective regions. The overviews and case studies were expected:

- to examine the possible effects of the sea level changes on the coastal ecosystems (deltas, estuaries, wetlands, coastal plains, coral reefs, mangroves, lagoons, etc);
- to examine the possible effects of temperature elevations on the terrestrial and aquatic ecosystems including the possible effects on economically important species;
- to examine the possible effects of climatic, physiographic and ecological changes on the socio-economic structures and activities; and
- to determine areas or systems which appear to be most vulnerable to the above changes.

The regional studies were intended to cover the marine environment and adjacent coastal areas influenced by or influencing the marine environment.

The regional studies prepared by the Task Teams were planned to be presented to the intergovernmental meetings convened in the framework of the relevant Regional Seas Action Plans in order to draw the countries' attention to the problems associated with expected climate change and to prompt their involvement in development of policy options and response measures suitable for their region.

^{1/} UNEP/GC/DEC/14/20.

The site specific case studies developed by the Task Teams were planned to be presented to national seminars.

Once the initial objective of the Task Teams (impact studies) is achieved, they concentrate on providing assistance to national authorities in defining specific policy options and suitable response measures.

The initial objectives of the Mediterranean, Caribbean and the South Pacific Task Teams have been completed and were reviewed by a meeting of the representatives of the Task Teams (Split, 3-8 October 1982)^{2/}. The work of the other three Task Teams is expected to be completed by the end of 1989. The establishment of two additional Task Teams (for the West and Central African region and for the Eastern African region) is in process.

Review on the interaction on a global scale of the oceans with greenhouse gases and atmospheric aerosols was published^{3/} on the basis of the work carried out by a working group of GESAMP.

A special intergovernmental meeting will be convened in mid-1989 in Marshall islands for the 19 island States of the South Pacific to consider their policy options, suitable response mechanisms and additional site specific case studies to be developed.

A detailed case study on the Maldives was prepared with assistance of the South Pacific and the Mediterranean Task Teams and will probably lead to a large-scale country project.

The drafts of the regional studies (overviews) of the Task Teams were already considered by meetings convened under the Mediterranean, Caribbean, South Pacific, South-East Pacific and East Asian Seas Action Plans and for the Mediterranean^{4/} has already been published.

One site specific case study (Delta of Nile) was presented at a national seminar (December 1988). Two additional seminars are planned for mid-1989 (Delta of Po and Thermaikos Gulf).

The development of a climate scenario for the Mediterranean region has been initiated. It is planned to be completed in 1990 and to be used in connection with the revision of the Mediterranean regional study.

This volume contains bibliography on effects of climatic change and related topics.

2/ UNEP(OCA)/WG.2/25.

3/ UNEP Regional Seas Reports and Studies No. 94, UNEP 1988.

INTRODUCTION

This volume of nearly 1500 bibliographic entries has been compiled largely from material in the Mediterranean Co-ordinating Unit library collection and in the collections of the Yale School of Forestry and Environmental Sciences, the Woods Hole Oceanographic Institution, the National Hellenic Research Foundation, the National Centre for Marine Research, the Nuclear Research Centre "Democritus" and the Institute of Geology and Mineral Exploration. For the computerized searches the facilities and services of the National Documentation Centre of the National Hellenic Research Foundation were used.

The following computerized data bases were searched on line:

- ASFA
- BIOSIS
- COMPEER
- DELFT HYDRAULICS
- ENVPOINT
- GEOREF
- NTIS
- OCEANIC ABSTRACTS
- POLLUTION ABSTRACTS
- SCIENCE CITATION INDEX
- SOCIAL SCIENCE INDEX

Material retrieved was checked against the original or other sources. The criterion for the basis on which the selection was made was the need to include all references directly concerning --or possibly relevant to--the Mediterranean either in providing information on climatic change and its effects or in giving examples of the methodological approach which could be used in the Mediterranean studies. The time span has been limited to post-1983 though several pre-1983 publications have been exceptionally included because of particular interest or specific reference to the Mediterranean area.

The bibliography by author follows this introduction. Each reference is cited by personal author or corporate body followed by the year of publication; the title in its original language with a translation into English if appropriate; the source of publication, with volume number and pages in the case of a periodical title and other pertinent information; pages and editor in the case of a monograph or a proceedings; document number where it applies; and publication details. Each entry has been assigned an accession number which is reflected in the Subject/Keyword Index under the relevant subject.

Five major subject areas are listed:

- A CLIMATE
- B PAST CLIMATIC CHANGES
- C GREENHOUSE EFFECT
- D GREENHOUSE WARMING - IMPACT
- E GEOGRAPHIC AREAS

Descriptors relevant to each main subject area appear listed in alphabetical order by accession number within the main subject headings. Publications containing references to more than one subject appear under more than one descriptor since the retrieval of records has been done electronically by means of a keyword either assigned in the descriptor field or contained in the title

In September 1988 a preliminary edition of this bibliography was distributed among scientists participating in the Mediterranean Task Team for their comments and input. This edition has been amended based on those comments.

This volume is one of a series of specialized bibliographies on marine pollution, in the Mediterranean which are under preparation by the Unit and constitutes a part of the MEDLIB database that is continuously updated as new material arises.

A DOS-system personal computer and Micro-CDS/ISIS developed by UNESCO were used for the organization and management of the database, which may be queried. Deposited references may be retrieved to produce specialized literature searches on request.

Cited references not included in the MEDU library collection may be retrieved through interlibrary loan as time and resources permit.

This effort is considered to be a continuous one, and it is hoped that interested scientists will be encouraged to contribute further comments publications and findings so that an updated edition may be published at a future date.

This bibliography has been prepared by Athena Davaki Librarian, UNEP Consultant

Acknowledgements

With deep appreciation acknowledged here are:

The National Documentation Centre of the National Hellenic Research Foundation and Ms. Heleni Poulakaki, chief literature searcher for their expertise and generous support without which this project would not have been possible.

Dr. Joseph A. Miller Librarian School of Forestry and Environmental Sciences Yale University, for his unfailing support and in-kind contribution to this project.

The Yale-Forestry and Environmental Sciences Library, the National Hellenic Research Foundation Library, the Woods Hole Oceanographic Institution Library, the National Centre for Marine Research Library, the Nuclear Research Centre "Democritus" Library and the Institute of Geology and Mineral Exploration Library for their reference and interlibrary loan services generously rendered.

Dr. Juliano Sestini Geologist, for his contributions; Mr. Nicos Papatheodorou for his technical assistance; and Ms. Polly Ballis for the many hours of data entry.

SUBJECT/KEYWORD INDEX

Five main subject areas are listed. Descriptors relevant to each main subject area appear in alphabetical order within the main subject headings. Publications containing references to more than one subject appear under more than one keyword/descriptor.

CLIMATE

Atmosphere--Climatic catastrophe
Clouds
Extreme events
Nuclear
Precipitation
Storms
Temperature/Events
Volcanic

Climatic change

PAST CLIMATIC CHANGES

Holocene
Paleoclimatic
Pleistocene
Quaternary

GREENHOUSE EFFECT

Gases--Aerosol
Carbon dioxide
Methane
Nitrogen
Oxygen
Ozone
Radiation
Sulphur
Trace gases

Greenhouse effect

Methods, Models--Detection
Measurements
Methods
Models
Remote Sensing
Scenaria

Subject/Keyword Index--Categories Used

GREENHOUSE WARMING - IMPACT

Climate warming

Ecosystems--Biosphere

- Desertification
- Ecosystems
- Forests
- Marshes
- Plants
- Trees
- Vegetation

Impact on society--Agriculture

- Crops
- Economy
- Energy
- Fisheries
- Forestry
- Health
- Planning
- Policy
- Society
- Socioeconomic

Oceans, Seas, Hydrology--Coastal erosion, changes

- El Nino
- Floods
- Glaciers
- Hydrology
- Ice sheet
- Oceans, Seas
- Rivers
- Salinity
- Sea ice
- Sea level changes
- Sea level rise

PUBLICATIONS IN THE MAP TECHNICAL REPORTS SERIES

- No. 1 UNEP/IOC/WMO: Baseline studies and monitoring of oil and petroleum hydrocarbons in marine waters (MED POL I). MAP Technical Reports Series No. 1. UNEP, Athens 1986 (96 pages) (parts in English, French or Spanish only).
- No. 2 UNEP/FAO: Baseline studies and monitoring of metals, particularly mercury and cadmium, in marine organisms (MED POL II). MAP Technical Reports Series No. 2. UNEP, Athens 1986 (220 pages) (parts in English, French or Spanish only).
- No. 3 UNEP/FAO: Baseline studies and monitoring of DDT, PCBs and other chlorinated hydrocarbons in marine organisms (MED POL III). MAP Technical Reports Series No. 3. UNEP, Athens 1986 (128 pages) (parts in English, French or Spanish only).
- No. 4 UNEP/FAO: Research on the effects of pollutants on marine organisms and their populations (MED POL IV). MAP Technical Reports Series No. 4. UNEP, Athens 1986 (118 pages) (parts in English, French or Spanish only).
- No. 5 UNEP/FAO: Research on the effects of pollutants on marine communities and ecosystems (MED POL V). MAP Technical Reports Series No. 5. UNEP, Athens 1986 (146 pages) (parts in English or French only).
- No. 6 UNEP/IOC: Problems of coastal transport of pollutants (MED POL VI). MAP Technical Reports Series No. 6. UNEP, Athens 1986 (100 pages) (English only).
- No. 7 UNEP/WHO: Coastal water quality control (MED POL VII). MAP Technical Reports Series No. 7. UNEP, Athens 1986 (426 pages) (parts in English or French only).
- No. 8 UNEP/IAEA/IOC: Biogeochemical studies of selected pollutants in the open waters of the Mediterranean (MED POL VIII). MAP Technical Reports Series No. 8. UNEP, Athens 1986 (42 pages) (parts in English or French only).
- No. 8 UNEP: Biogeochemical studies of selected pollutants in the open waters of the Mediterranean (MED POL VIII). Addendum, Greek Oceanographic Cruise 1980. MAP Technical Reports Series No. 8, Addendum. UNEP, Athens 1986 (66 pages) (English only).
- No. 9 UNEP: Co-ordinated mediterranean pollution monitoring and research programme (MED POL - PHASE I). Final report. 1975 - 1980. MAP Technical Reports Series No. 9. UNEP, Athens 1986 (276 pages) (English only).
- No. 10 UNEP: Research on the toxicity, persistence, bioaccumulation, carcinogenicity and mutagenicity of selected substances (Activity G). Final reports on projects dealing with toxicity (1983-85). MAP Technical Reports Series No. 10. UNEP, Athens 1987 (118 pages) (English only).
- No. 11 UNEP: Rehabilitation and reconstruction of Mediterranean historic settlements. Documents produced in the first stage of the Priority Action (1984-1985). MAP Technical Reports Series No. 11. UNEP, Priority Actions Programme, Regional Activity Centre, Split 1986 (158 pages) (parts in English or French only).

- No.12 UNEP: Water resources development of small Mediterranean islands and isolated coastal areas. Documents produced in the first stage of the Priority Action (1984-1985). MAP Technical Reports Series No. 12. UNEP, Priority Actions Programme, Regional Activity Centre, Split 1987 (162 pages) (parts in English or French only).
- No.13 UNEP: Specific topics related to water resources development of large Mediterranean islands. Documents produced in the second phase of the Priority Action (1985-1986). MAP Technical Reports Series No. 13. UNEP, Priority Actions Programme, Regional Activity Centre, Split 1987 (162 pages) (parts in English or French only).
- No.14 UNEP: Experience of Mediterranean historic towns in the integrated process of rehabilitation of urban and architectural heritage. Documents produced in the second phase of the Priority Action (1986). MAP Technical Reports Series No. 14. UNEP, Priority Actions Programme, Regional Activity Centre, Split 1987 (500 pages) (parts in English or French only).
- No.15 UNEP: Environmental aspects of aquaculture development in the Mediterranean region. Documents produced in the period 1985-1987. MAP Technical Reports Series No. 15. UNEP, Priority Actions Programme, Regional Activity Centre, Split 1987 (101 pages) (English only).
- No.16 UNEP: Promotion of soil protection as an essential component of environmental protection in Mediterranean coastal zones. Selected documents (1985-1987). MAP Technical Reports Series No. 16. UNEP, Priority Actions Programme, Regional Activity Centre, Split 1987 (424 pages) (parts in English or French only).
- No.17 UNEP: Seismic risk reduction in the Mediterranean region. Selected studies and documents (1985-1987). MAP Technical Reports Series No. 17. UNEP, Priority Actions Programme, Regional Activity Centre, Split 1987 (247 pages) (parts in English or French only).
- No.18 UNEP/FAO/WHO: Assessment of the state of pollution of the Mediterranean Sea by mercury and mercury compounds. MAP Technical Reports Series No. 18. UNEP, Athens 1987 (354 pages) (English and French).
- No.19 UNEP/IOC: Assessment of the state of pollution of the Mediterranean Sea by petroleum hydrocarbons. MAP Technical Reports Series No. 19, UNEP, Athens 1988 (130 pages) (English and French).
- No.20 UNEP/WHO: Epidemiological studies related to Environmental Quality Criteria for bathing waters, shellfish-growing waters and edible marine organisms (Activity D). Final report on project on relationship between microbial quality of coastal seawater and health effects (1983-86). MAP Technical Reports Series No. 20. UNEP, Athens 1988 (156 pages) (English only).
- No.21 UNEP/UNESCO/FAO: Eutrophication in the Mediterranean Sea: Receiving Capacity and Monitoring of Long term Effects. MAP Technical Reports Series No. 21. UNEP, Athens 1988 (200 pages) (parts in English or French only).
