The **UNEP World Conservation Monitoring Centre** (UNEP-WCMC) is the biodiversity assessment and policy implementation arm of the United Nations Environment Programme, the world's foremost intergovernmental environmental organization. UNEP-WCMC aims to help decision-makers recognize the value of biodiversity to people everywhere, and to apply this knowledge in all that they do. The Centre's challenge is to transform complex data into policy-relevant information, to build tools and systems for analysis and integration of these data, and to support the needs of nations and the international community as they engage in joint programmes of action.

El **PNUMA Centro de Monitoreo de la Conservación Mundial** (UNEP-WCMC) es el brazo del Programa de las Naciones Unidas del Medio Ambiente, la principal organización intergubernamental ambiental en el mundo, encargado de evaluar la biodiversidad y la implementación de políticas ambientales. El UNEP-WCMC aspira a ayudar a tomadores de decisiones a reconocer el valor de la biodiversidad para la gente de todo el mundo, y a aplicar este conocimiento en todo lo que hacen. El desafío del Centro es transformar datos complejos en información relevante para las formulación de políticas de gestión, desarrollar instrumentos y sistemas para el análisis y la integración de esos datos, y apoyar las necesidades de las naciones y de la comunidad internacional en general en sus esfuerzos por desarrollar programas de acción conjunta.

Le **PNUE Centre de Surveillance Continue pour la Conservation de la Nature Mondiale** (UNEP-WCMC) est l'agence chargée de l'évaluation de la diversité biologique et de la mise en oeuvre des directives du Programme des Nations Unies pour l'Environnement, la principale organisation intergouvernementale environnementale au monde. Le Centre aspire à aider les gouvernements à reconnaître l'importance de la diversité biologique pour les êtres humains du monde entier et à appliquer cette connaissance à toutes leurs activités. Le défi du Centre consiste à transformer et simplifier des données complexes en informations pertinentes afin de trouver des outils et d'établir des systèmes permettant leur intégration et leur analyse dans la politique de tous les jours. Le Centre vise à appuyer les besoins des nations et de la communauté internationale dans leurs activités et programmes communs environnementaux.

Foreword

This edition of the *Checklist of CITES Species* takes into account the amendments to the CITES Appendices and the changes in nomenclature adopted at the 12th meeting of the Conference of the Parties to CITES (Santiago, 2002).

At its 12th meeting, the Conference of the Parties adopted the Checklist and its updates accepted by the Nomenclature Committee as the standard nomenclature to the names of species listed in the CITES Appendices. We are most grateful to the UNEP World Conservation Monitoring Centre (UNEP-WCMC) for undertaking the production of this Checklist once again, and particularly to the staff responsible for the meticulous work involved.

The costs of preparation and production of this Checklist have been borne by the European Commission, the Joint Nature Conservation Committee (United Kingdom) and UNEP-WCMC, as well as by the CITES Secretariat, and we wish to thank our partners very much for their important contributions.

We know that this Checklist is widely used and appreciated by Management Authorities, Scientific Authorities, Customs officers and other people involved in the implementation of CITES, as well as by non-governmental organizations, academics, the press and others. We are conscious, however, that we must continue to try to meet the changing needs of the users of this guide. For this reason in particular, we welcome the comments and suggestions of all users on ways to improve it in the future.

Acknowledgements

This publication was prepared on behalf of the CITES Secretariat by the UNEP World Conservation Monitoring Centre (UNEP-WCMC). It was edited by Tim Inskipp and Harriet Gillett, supported by Alice Davies and Joan Field. Technical support was provided by James O'Carroll, Paul Birrel and Phill Fox. The project was supervised by Gerardo Fragoso.

The production team are most grateful to the staff of the CITES Secretariat for their advice and assistance. UNEP-WCMC also wishes to acknowledge the financial support of the European Commission and of the Joint Nature Conservation Committee of the United Kingdom, which has made possible the production of this book and CD-ROM.

Introduction

CITES-listed fauna and flora

This book and CD-ROM provide a Checklist of the fauna and the flora listed in Appendices I, II and III of CITES as adopted by the Conference of the Parties, valid from 13 February 2003. The CD-ROM also includes the Annotated Appendices, which have an index to family names and common names. It is hoped that these lists will act as an aid to Management and Scientific Authorities, Customs officials, and all others involved in implementing and enforcing the Convention.

General note

The names used in the CITES Appendices are the scientific names approved by the CITES Nomenclature Committee. Common names in the Checklist and Annotated Appendices are included only for reference. If the common name of an animal or plant included in the CITES Appendices is not included, it should be looked for under its scientific name or under another common name.

Species included in the Checklist and Annotated Appendices are referred to:

- a) by the name of the species; or
- b) as being all of the species included in a higher taxon or designated part thereof.

Other references to taxa above the specific level are for the purposes of information or classification only.

Further details relating to each taxon, including distribution and author names, are included in the CITES-species database available on the CITES website (www.cites.org).

Checklist

The Checklist of CITES-listed species comprises an alphabetical list of fauna followed by flora. There are three types of entry: scientific name, common name and scientific synonym. The common name and synonym entries serve as indexes to the adopted scientific name entries, where CITES-related information is provided.

Scientific name

The Checklist contains the scientific names, in alphabetical order, of all animal and plant taxa listed in the CITES Appendices, with the exception of Appendix-II listed orchids, for which only the name of the genus is included, e.g. *Cattleya* spp.

- | | | |
|--------|----|--|
| Format | 1) | The scientific name |
| | 2) | Optional – English (E), French (F) and Spanish (S) common names; |
| | 3) | Optional – the symbol #1-#8 (see <i>Interpretation</i> below); |

- 4) The Appendix or Appendices in which the species is listed, I, II or III, or 'NC' for taxa that are not, or only partly, covered by CITES listings¹. Some taxa may be split-listed, that is they may be included partly in one Appendix and partly in another. For a taxon listed in both Appendix I and II, for instance, this would be indicated by 'I/II'. In other cases only certain populations are listed whilst others are not covered by the provisions of the Convention. For a taxon partly listed in Appendix I and partly not listed, for instance, this would be indicated by 'I/NC';
- 5) For fauna, the family in capital letters and a two-letter code for the class in which the species is included. The following codes are used:

Ac = Actinopterygii
 Am = Amphibia
 An = Anthozoa
 Ar = Arachnida
 Av = Aves
 Bi = Bivalvia
 El = Elasmobranchii
 Ga = Gastropoda
 Hi = Hirudinoidea
 Hy = Hydrozoa
 In = Insecta
 Ma = Mammalia
 Re = Reptilia
 Sa = Sarcopterygii

Examples	<i>Abeillia abeillei</i> : (E) Emerald-chinned hummingbird, (S) Colibrí barbiesmeralda, (F) Colibri d'Abeillé II TROCHILIDAE Av <i>Cattleya</i> spp. #7 I/II ORCHIDACEAE
----------	---

Common name

Where available, English, Spanish and French common names are provided.

Format	The common name, either English (E), Spanish (S) or French (F), is followed by the corresponding scientific name. There is only one entry for each common name, e.g. there is an entry for 'Golden Eagle' but not for 'Eagle, Golden'.
Examples	Parrots (E): PSITTACIFORMES spp. Slipper orchids (E): <i>Paphiopedilum</i> spp./ <i>Phragmipedium</i> spp. Emerald-chinned humingbird (E): <i>Abeillia abeillei</i>

¹ A few species not listed in the CITES Appendices are included for information, namely two species of Psittaciformes: *Melopsittacus undulatus* and *Nymphicus hollandicus*, and four species of Falconiformes: *Cathartes aura*, *Cathartes burrovianus*, *Cathartes melambrotus* and *Coragyps atratus* – these are the only species in these large orders not to be covered by CITES provisions. Similarly, *Aloe vera* is the only species of *Aloe* not listed in the Appendices.

Scientific synonym

Some synonyms of scientific names are listed, but these are not comprehensive.

Format A scientific synonym is followed by = and then the adopted scientific name. The latter name should be looked up alphabetically to find the other relevant information about the species.

Example *Tirucallia goetzei* = *Euphorbia goetzei*

Annotated Appendices and reservations (CD-ROM only)

Information is provided on all taxa currently or previously included in the CITES Appendices. The original listing date is given for all taxa (orders, families, genera, species, subspecies) and populations specifically named in the current Appendices, or in earlier versions of the Appendices. All reservations made by Parties are listed, with the dates on which they entered into force and, in the case of past reservations, the dates on which they were withdrawn.

The information is arranged in taxonomic order, with common names provided for higher taxa, e.g. URSIDAE (bears). In cases where only one or a few species are listed in a family, the common name of a relevant species is provided, e.g. ESCHRICHTIIDAE (Grey Whale). These common names are included in the index.

Note: The Checklist has many more English, French and Spanish common names of species linked to the corresponding scientific species names, and also to the appropriate family name, than the Annotated Appendices. As an example, to locate the Big-headed Sideneck, first use the Checklist, where the name will be found linked to *Peltocephalus dumeriliana*, then search for *Peltocephalus dumeriliana* in the Annotated Appendices.

Five columns provide information on: Scientific name, CITES Appendix, ISO codes, Dates and Notes, as follows:

Scientific name

This column contains the scientific names of the taxa that are, or have been, listed in the Appendices. These names may be at various taxonomic levels: order, family, genus, species, subspecies or variety. Orders and families are given in the same taxonomic sequence as that used in the CITES Appendices. Species (and subspecies) are listed in alphabetical sequence within each family. Higher taxon names given in bold are provided for information only.

CITES Appendix

The next three columns list the Appendix or Appendices in which the taxa are or were listed. Reservations made by Parties are indicated by adding ‘r’ to the Appendix number, to signify the entry into force, and ‘w’ to signify the withdrawal of the reservation. If both Appendix I and Appendix II are applicable to a particular taxon on one date, Appendix I appears first in the list. ‘Del’ in one of the three columns, instead of an Appendix number, indicates that the taxon was deleted from that Appendix on the given date.

ISO codes

This column provides the ISO code of every Party or territory mentioned in relation to inclusions in Appendix III, to reservations and to species that are split-listed or only partially listed.

FR	France	NL	Netherlands	ZW	Zimbabwe
GB	United Kingdom	NO	Norway		

Dates

This column contains the dates when changes to the Appendices in relation to the species concerned came into effect. The dates are listed chronologically (as day/month/year, e.g. 01/07/75 = 1 July 1975), with the earliest date first. The subsequent listing history of the taxon or population can be determined by examining the following lines. Where populations of a taxon are split between Appendix I and Appendix II, both Appendices are indicated against every date when a change has taken place, with notes indicating the status of all populations each Appendix.

Notes

The final column contains any extra information. This may relate to the changes and the situation after each change has taken place. Where separate populations are involved the history is provided in a cumulative manner, so that any changes to the listings between the various Appendices can be tracked by reading the lines that refer to each change. References to populations are indicated by the use of two-letter ISO country or territory codes (see above). Other notes provide further information about the listed taxa, e.g. scientific synonyms. The term 'Included with...' indicates that the taxon concerned was originally listed separately but has subsequently been subsumed in a higher taxon. The term 'Listed under...' indicates that the taxon or population concerned was originally part of a higher taxon listing but has subsequently been treated separately, either through a transfer to another Appendix or a reservation.

As an example, if one looks at the listing history of the population of Malawi of *Crocodylus niloticus*, one will see that the first entry for this species shows that the species (i.e. all populations) was listed in Appendix I on 1 July 1975. Below this are a number of entries referring to transfer of various populations between Appendix I and Appendix II. One of these indicates that the population of Malawi (MW) was transferred to Appendix II on 1 August 1985. A further entry shows that on 18 January 1990 an Appendix-II ranching programme for this species came into effect, and the final entry summarizes the current situation for the species, confirming that the ranched population of Malawi is still in Appendix II.

Key to annotations

I	=	listed on Appendix I	spp.	=	all species of a higher taxon

r	=	reservation entered by the named Party			

Interpretation

In accordance with Article I, paragraph (b), sub-paragraph (iii), of the Convention, the symbol (#) followed by a number placed against the name of a species or higher taxon included in Appendix II or III designates parts or derivatives which are specified in relation thereto for the purposes of the Convention as follows:

- #1 Designates all parts and derivatives, except: seeds, spores and pollen (including pollinia);
 - a) seedling or tissue cultures obtained *in vitro*, in solid or liquid media, transported in sterile containers; and
 - b) cut flowers of artificially propagated plants.
- #2 Designates all parts and derivatives, except:
 - a) seeds and pollen;
 - b) seedling or tissue cultures obtained *in vitro*, in solid or liquid media, transported in sterile containers;
 - c) cut flowers of artificially propagated plants; and
 - d) chemical derivatives and finished pharmaceutical products.
- #3 Designates whole and sliced roots and parts of roots, excluding manufactured parts or derivatives such as powders, pills, extracts, tonics, teas and confectionery.
- #4 Designates all parts and derivatives, except:
 - a) seeds, except those from Mexican cacti originating in Mexico, and pollen;
 - b) seedling or tissue cultures obtained *in vitro*, in solid or liquid media, transported in sterile containers;
 - c) cut flowers of artificially propagated plants;
 - d) fruits and parts and derivatives thereof of naturalized or artificially propagated plants; and
 - e) separate stem joints (pads) and parts and derivatives thereof of naturalized or artificially propagated plants of the genus *Opuntia* subgenus *Opuntia*.
- #5 Designates logs, sawn wood and veneer sheets.
- #6 Designates logs, sawn wood, veneer sheets and plywood.
- #7 Designates logs, wood-chips and unprocessed broken material.
- #8 Designates all parts and derivatives, except:
 - a) seeds and pollen (including pollinia);
 - b) seedling or tissue cultures obtained *in vitro*, in solid or liquid media, transported in sterile containers;
 - c) cut flowers of artificially propagated plants; and
 - d) fruits and parts and derivatives thereof of artificially propagated plants of the genus *Vanilla*.

Prólogo

En esta versión de la *Lista de Especies CITES* se han incluido las enmiendas a los Apéndices de la CITES y las modificaciones en la nomenclatura aprobadas en la 12a. reunión de la Conferencia de las Partes en la Convención (Santiago, noviembre de 2002).

En su 12a. reunión, la Conferencia de las Partes adoptó la Lista y sus actualizaciones aceptadas por el Comité de Nomenclatura como la referencia normalizada para los nombres de las especies incluidas en los Apéndices de la CITES. Expresamos nuestro agradecimiento al PNUMA-Centro de Monitoreo de la Conservación Mundial (UNEP-WCMC) por haber producido nuevamente esta Lista y, en particular, al personal encargado de esta meticulosa labor.

Los gastos de preparación y producción de esta Lista fueron sufragados por la Comisión Europea, el *Joint Nature Conservation Committee* (Reino Unido) y el UNEP-WCMC, así como por la Secretaría de la CITES. Deseamos dar las gracias a nuestros colaboradores por sus importantes contribuciones.

Sabemos que esta Lista es ampliamente utilizada y apreciada por las Autoridades Administrativas y Científicas, los funcionarios de aduanas y otras personas interesadas en la aplicación de la CITES, así como por las organizaciones no gubernamentales, los medios académicos, la prensa y otras entidades. Somos conscientes, sin embargo, de que debemos seguir tratando de satisfacer las necesidades cambiantes de los usuarios de esta guía. Por esta razón, acogemos con beneplácito los comentarios y sugerencias de todos los usuarios sobre la forma de mejorarla en el futuro.

Secretaría de la CITES
Ginebra
2003

Agradecimientos

Esta publicación fue preparada en nombre de la Secretaría de la CITES por el PNUMA Centro de Monitoreo de la Conservación Mundial (UNEP-WCMC). Fue compilada por Tim Inskipp y Harriet Gillett, con el apoyo de Alice Davies y Joan Field. James O'Carroll, Paul Birrel y Phill Fox prestaron apoyo técnico. Gerardo Fragoso se encargó de la supervisión de este proyecto.

El equipo de producción expresa su agradecimiento al personal de la Secretaría de la CITES por su asesoramiento y asistencia. El UNEP-WCMC desea dar asimismo las gracias a la Comisión Europea y al *Joint Nature Conservation Committee* del Reino Unido por su concurso financiero, que ha hecho posible la producción de esta publicación y del CD-ROM.

Introducción

Especies de fauna y flora incluidas en los Apéndices de la CITES

En esta publicación y CD-ROM se presenta una Lista de especies de fauna y de flora incluidas en los Apéndices I, II y III de la CITES, tal como fue aprobada por la Conferencia de las Partes, válida a partir del 13 de febrero de 2003. En el CD-ROM se incluyen también los Apéndices anotados, con un índice de los nombres de las familias y los nombres comunes. Se alberga la esperanza de que sea útil para las Autoridades Administrativas y Científicas, los funcionarios de aduana y otras personas interesadas en la aplicación y observancia de la Convención.

Observación general

En los Apéndices de la CITES se utilizan los nombres científicos aprobados por el Comité de Nomenclatura de la CITES. En esta Lista y en los Apéndices anotados, se incluyen los nombres comunes a título de referencia. Si no se aparece el nombre común de un animal o planta incluido en los Apéndices de la CITES, debería buscarse bajo su nombre científico o bajo otro nombre común.

Las especies que figuran en la Lista y en los Apéndices anotados se clasifican:

- a) con arreglo al nombre de las especies; o
- b) como si todas las especies estuviesen incluidas en un taxón superior o en una parte designada del mismo.

Otras referencias a los taxa superiores de la especie se indican únicamente a título de información o de clasificación.

En la base de datos de las especies CITES, disponible en el sitio web de la CITES (www.cites.org), se presenta mayor información sobre cada taxón, incluida la distribución y los nombres de los autores.

Lista de especies CITES

La Lista de especies CITES consta de una lista alfabética de la fauna, seguida por la flora. Hay tres tipos de entradas: el nombre científico, el nombre común y el sinónimo científico. Los nombres comunes y los sinónimos remiten a los nombres científicos adoptados, donde se proporciona la información conexa CITES.

Nombre científico

La Lista contiene los nombres científicos, por orden alfabético, de todos los taxa animales y vegetales incluidos en los Apéndices de la CITES, a la excepción de las orquídeas incluidas en el Apéndice II, para las que solamente se incluye el nombre del género, por ejemplo, *Cattleya* spp.

- | | | |
|---------|----|---|
| Formato | 1) | Nombre científico |
| | 2) | Optativo - nombres comunes en español (S), francés (F) e inglés (E) |
| | 3) | Optativo – el símbolo #1-#8 (véase la <i>Interpretación</i> abajo); |

- 4) Los Apéndices I, II o III en que está incluida la especie, o 'NC' para taxa que no están, o están parcialmente, incluidos en los Apéndices de la CITES¹). Algunos taxa son objeto de inclusión dividida, lo que significa que pueden estar parcialmente incluidas en un Apéndice y parcialmente en otro. Cuando un taxón está incluido en el Apéndice I y II, por ejemplo, se indicará mediante 'I/II'. En ocasiones, solo están incluidas ciertas poblaciones, mientras que otras no están amparadas por la Convención. Para un taxón parcialmente incluido en el Apéndice I y parcialmente no incluido en otro Apéndice, se indicará mediante 'I/NC';
- 5) Para la fauna, la familia en letras mayúsculas y un código de dos letras para la clase en que está incluida la especie. Se utilizan los siguientes códigos:

Ac = Actinopterygii
 Am = Amphibia
 An = Anthozoa
 Ar = Arachnida
 Av = Aves
 Bi = Bivalvia
 El = Elasmobranchii
 Ga = Gastropoda
 Hi = Hirudinoidea
 Hy = Hydrozoa
 In = Insecta
 Ma = Mammalia
 Re = Reptilia
 Sa = Sarcopterygii

Ejemplos	<i>Abeillia abeillei</i> : (E) Emerald-chinned hummingbird, (S) Colibrí barbiesmeralda, (F) Colibri d'Abeillé II TROCHILIDAE Av <i>Cattleya</i> spp. #7 I/II Orchidaceae
----------	---

Nombre común

En la medida de lo posible, se indican los nombres comunes en español, francés e inglés.

Formato	El nombre común, ya sea en inglés (E), español (S) o francés (F), va seguido por el correspondiente nombre científico. Solo hay una entrada para cada nombre común, así, pues, solo hay una entrada para ‘águila real’, pero no para ‘real, águila’.
---------	--

Ejemplos	Loros (S): PSITTACIFORMES spp. Slipper orchids (E): <i>Paphiopedilum</i> spp., <i>Phragmipedium</i> spp. Colibrí barbiesmeralda (S): <i>Abeillia abeillei</i>
----------	---

¹ A título informativo, se incluyen algunas especies que no figuran en los Apéndices de la CITES, concretamente dos especies de Psittaciformes: *Melopsittacus undulatus* y *Nymphicus hollandicus*, y cuatro especies de Falconiformes: *Cathartes aura*, *Cathartes burrovianus*, *Cathartes melambrotus* y *Coragyps atratus*. Son las únicas especies de estos amplios órdenes que no están amparadas por la CITES. De igual modo, *Aloe vera* es la única especie de *Aloe* que no está incluida en los Apéndices.

Sinónimos científicos

Se incluyen algunos sinónimos de los nombres científicos, pero la lista no es exhaustiva.

Formato	Un sinónimo científico va seguido por ‘=’ y por el nombre científico aceptado. Para acceder a mayor información sobre la especie, debe consultarse este último, por orden alfabético.
Ejemplo	<i>Tirucallia goetzei</i> = <i>Euphorbia goetzei</i>

Apéndices y reservas anotados de la CITES (únicamente CD-ROM)

Se incluye información sobre todos los taxa incluidos actual o anteriormente en los Apéndices de la CITES. Se indica la fecha de inclusión de todos los taxa (orden, familia, género, especie, subespecie) y las poblaciones citadas en los Apéndices en vigor, o en anteriores versiones de los Apéndices. Se indican también todas las reservas formuladas por las Partes, con la fecha en que entraron en vigor y, en el caso de antiguas reservas, la fecha en que se retiraron.

La información se presenta por orden taxonómico, con los nombres comunes para los taxa superiores, p.e. URSIDAE (osos). En casos en que solo una o varias especies están incluidas en una familia, se indica el nombre común de una especie relevante, p.e. ESCHRICHTIIDAE (ballena gris). Estos nombres, y los nombres de la familia, se incluyen en el índice.

Nota: En la Lista figuran muchos más nombres comunes de especies en español, francés e inglés, con conexión con los correspondientes nombres científicos, que en los Apéndices anotados. Por ejemplo, para encontrar la especie cabezón, consulte primero la Lista, donde ese nombre aparece asociado a *Peltcephalus dumeriliana*. Busque luego *Peltcephalus dumeriliana* en los Apéndices anotados.

En cinco columnas se ofrece información sobre: el nombre científico, el Apéndice de la CITES, el código ISO, las fechas y las notas, como sigue:

Nombre científico

En la primera columna figuran los nombres científicos de los taxa que están incluidos o han estado incluidos en los Apéndices. Estos nombres pueden referirse a diversos niveles taxonómicos: orden, familia, género y/o especie, subespecie. Los órdenes y las familias figuran en el mismo orden de sucesión taxonómica que la utilizada en los Apéndices oficiales de la CITES (salvo para las familias de anfibios, que se incluyen por orden alfabético dentro de los dos órdenes, como en el Manual de Identificación de la CITES). Las especies (y las subspecies) se indican por orden de sucesión alfabética dentro de cada familia. Obsérvese que los nombres del taxón superior que aparecen en negrita se indican únicamente a título informativo.

Apéndice de la CITES

En las tres columnas siguientes figuran los Apéndices en los que están o estaban incluidos los taxa. Las reservas formuladas por las Partes se indican añadiendo “/r” al número del Apéndice, para señalar la fecha de entrada en vigor y “/w” para indicar que la reserva fue retirada. Si el Apéndice I y el Apéndice II se aplican a un taxón determinado en una fecha, se indica en primer lugar el Apéndice I. Cuando aparece la letra “Del” en una de las tres columnas, en vez del número del Apéndice, significa que el taxón se suprimió de dicho Apéndice en la fecha señalada.

Código ISO

En esta columna se presenta el código ISO de cada Parte o territorio mencionado en relación con una inclusión en el Apéndice III, las reservas y las especies objeto de inclusión dividida o parcial.

AF	Afganistán	GH	Ghana	NP	Nepal
AR	Argentina	GR	Grecia	NZ	Nueva Zelanda

Fechas

En esta columna aparecen las fechas en que entraron en vigor los cambios en los Apéndices en relación con las especies. La fechas aparecen por orden cronológico (día/mes/año, es decir, 01/07/75 = 1 de julio de 1975), indicándose en primer lugar la fecha más antigua. La evolución de la inclusión de un taxón/población puede determinarse examinando las líneas siguientes. Cuando las poblaciones de un taxón están divididas entre el Apéndice I y el Apéndice II, ambos Apéndices figuran al lado de cada fecha cuando se produjo un cambio, con notas en las que se indica el estado de todas las poblaciones en cada uno de los Apéndices.

Notas

La última columna contiene toda la información complementaria sobre los cambios y la situación después de cada cambio. Cuando se trata de poblaciones separadas, se muestra la evolución de modo que cualquier cambio en la inclusión entre varios Apéndices pueda determinarse leyendo las dos líneas que se refieren a cada cambio. Las referencias a las poblaciones se indican utilizando el código ISO de dos letras de cada país (véase *supra*). En otras notas se ofrece información complementaria sobre los taxa incluidos, por ejemplo, los sinónimos científicos. El término “Incluido con...” significa que el taxón en cuestión fue inicialmente incluido de forma separada pero fue posteriormente incluido en un taxón superior. El término “Incluido bajo ...” significa que el taxón en cuestión formaba parte inicialmente de un taxón superior pero fue posteriormente tratado por separado, bien sea transferido a otro Apéndice o sujeto a una reserva.

A modo de ejemplo, si se examina la historia de la inclusión en los Apéndices de la población de *Crocodylus niloticus* de Malawi, puede observarse que en la primera entrada para esta especie se indica que la especie (es decir, todas las poblaciones) se incluyó en el Apéndice I el 1 de julio de 1975. A continuación hay un número de entradas que se refieren a la transferencia de diversas poblaciones entre el Apéndice I y el Apéndice II. En una de ellas se indica que la población de Malawi (MW) fue transferida al Apéndice II el 1 de agosto de 1985. En otra entrada se indica que el 18 de enero de 1990 entró en vigor un programa de cría en granjas para esta especie y en la última entrada se resume la situación actual de esta especie, donde se confirma que la población de especímenes criados en granjas de Malawi sigue estando en el Apéndice II

Explicación de las anotaciones

I	=	incluida en el Apéndice I	spp.	=	todas las especies de un taxón superior
II	=	incluida en el Apéndice II	ssp.	=	subspecies
III	=	incluida en el Apéndice III	syn.	=	sinónimo
Del	=	suprimida de los Apéndices	var.	=	variedad
f	=	forma	w	=	reserva retirada por la Parte correspondiente
p.e.	=	posiblemente extinguida	#1-#8	=	se refiere a la <i>Interpretación</i> (véase abajo)
popn(s)	=	población(es)			
r	=	reserva formulada por la Parte correspondiente			

Interpretación

De conformidad con las disposiciones del párrafo b(iii) del Artículo I de la Convención, el signo (#) seguido de un número colocado junto al nombre de una especie o de un taxón superior incluido en el Apéndice II o III designa las partes o derivados provenientes de esa especie o de ese taxón y se indican como sigue a los efectos de la Convención:

- #1 Designa todas las partes y derivados, excepto:
 - a) las semillas, las esporas y el polen (inclusive las polinias);
 - b) los cultivos de plántulas o de tejidos obtenidos *in vitro*, en medios sólidos o líquidos, que se transportan en envases estériles; y
 - c) las flores cortadas de plantas reproducidas artificialmente.
- #2 Designa todas las partes y derivados, excepto:
 - a) las semillas y el polen;
 - b) los cultivos de plántulas o de tejidos obtenidos *in vitro*, en medios sólidos o líquidos, que se transportan en envases estériles;
 - c) las flores cortadas de plantas reproducidas artificialmente; y
 - d) los derivados químicos y productos farmacéuticos acabados.
- #3 Designa las raíces enteras o en rodajas o partes de las raíces, excluidas las partes o derivados manufacturados, tales como polvos, pastillas, extractos, tónicos, té y otros preparados.
- #4 Designa todas las partes y derivados, excepto:
 - a) las semillas, excepto las de las cactáceas mexicanas originarias de México, y el polen;
 - b) los cultivos de plántulas o de tejidos obtenidos *in vitro*, en medios sólidos o líquidos, que se transportan en envases estériles;
 - c) las flores cortadas de plantas reproducidas artificialmente;
 - d) los frutos, y sus partes y derivados, de plantas aclimatadas o reproducidas artificialmente; y
 - e) los elementos del tallo (ramificaciones), y sus partes y derivados, de plantas del género *Opuntia* subgénero *Opuntia* aclimatadas o reproducidas artificialmente.
- #5 Designa trozas, madera aserrada y láminas de chapa de madera.
- #6 Designa trozas, madera aserrada, láminas de chapa de madera y madera contrachapada.
- #7 Designa trozas, troceados de madera y material fragmentado no elaborado.
- #8 Designa todas las partes y derivados, excepto:
 - a) las semillas y el polen (inclusive las polinias);
 - b) los cultivos de plántulas o de tejidos obtenidos *in vitro*, en medios sólidos o líquidos, que se transportan en envases estériles;
 - c) las flores cortadas de ejemplares reproducidos artificialmente; y
 - d) los frutos, y sus partes y derivados, de plantas del género *Vanilla* reproducidas artificialmente.

Avant-propos

Cette édition de la *Liste des espèces CITES* intègre les amendements aux annexes CITES et les changements de nomenclature adoptés à la 12^e session de la Conférence des Parties à la CITES (Santiago, 2002).

A sa 12^e session, la Conférence des Parties a adopté la Liste et ses mises à jour acceptées par le Comité de la nomenclature comme nomenclature normalisée des noms des espèces inscrites aux annexes CITES. Nous sommes très reconnaissants au PNUE Centre de surveillance continue de la conservation mondiale de la nature (PNUE-WCMC) de s'être de nouveau attelé à cette tâche; nous adressons des remerciements particuliers au personnel qui a été chargé de ce travail méticuleux.

Les frais de préparation et de production de la Liste ont été pris en charge par la Commission européenne, le *Joint Nature Conservation Committee* (Royaume-Uni) et le PNUE-WCMC, ainsi que par le Secrétariat CITES; nous remercions vivement nos partenaires pour leur importante contribution.

Nous savons que la Liste des espèces CITES est largement utilisée et très appréciée par les organes de gestion, les autorités scientifiques, les douanes et les personnes impliquées dans la mise en œuvre de la CITES, ainsi que par les organisations non gouvernementales, les scientifiques, la presse et autres entités. Nous sommes par ailleurs conscients que nous devons continuer de nous adapter aux besoins nouveaux des utilisateurs de ce guide. C'est pour cette raison, entre autres, que nous souhaitons connaître les réactions et les suggestions des utilisateurs de cet ouvrage sur la manière dont nous pourrions l'améliorer à l'avenir.

Secrétariat CITES
Genève
2003

Remerciements

Cette publication a été préparée au nom du Secrétariat CITES par le PNUE Centre de surveillance continue de la conservation mondiale de la nature (PNUE-WCMC). Elle a été revue et corrigée par Tim Inskipp et Harriet Gillett avec l'assistance d'Alice Davies et de Joan Field et l'appui technique de James O'Carroll, Paul Birrel et Phill Fox. Gerardo Fragoso a géré le projet.

L'équipe chargée de la production de la Liste est très reconnaissante au personnel du Secrétariat CITES pour ses conseils et son assistance. Le PNUE-WCMC remercie également la Commission européenne pour son appui financier et le *Joint Nature Conservation Committee*, du Royaume-Uni, qui a rendu possible la production de ce livre et de son CD-ROM.

Introduction

Faune et flore CITES

Ce livre et son CD-ROM donnent la liste des espèces animales et végétales inscrites aux Annexes I, II et III de la CITES adoptée par la Conférence des Parties et valable à compter du 13 février 2003. Le CD-ROM inclut aussi les annexes annotées comportant un index des noms des familles et des noms communs en anglais. Les compilateurs espèrent qu'ils seront utiles au personnel des organes de gestion et des autorités scientifiques, ainsi qu'aux douaniers et à toutes les personnes chargées d'appliquer la Convention ou de la faire respecter.

Remarque générale

Les noms utilisés dans les annexes CITES sont les noms scientifiques acceptés par le Comité CITES de la nomenclature. Les noms communs figurant dans la Liste des espèces CITES et annexes et réserves CITES annotées sont donnés pour référence. Si l'utilisateur ne trouve pas le nom commun d'une plante ou d'un animal couvert par la CITES, il devra le rechercher sous son nom scientifique ou sous un autre nom commun.

Les espèces figurant dans la Liste des espèces CITES et annexes et réserves CITES annotées sont indiquées:

- a) par le nom de l'espèce; ou
- b) par l'ensemble des espèces appartenant à un taxon supérieur ou à une partie désignée dudit taxon.

Les autres références à des taxons supérieurs à l'espèce sont données uniquement à titre d'information ou à des fins de classification.

Le lecteur trouvera d'autres détails concernant chaque taxon, comme le nom de l'auteur et la répartition géographique, sur le site officiel de la CITES: <http://www.cites.org>

Liste des espèces CITES

La Liste des espèces CITES comprend une liste alphabétique d'espèces animales et une liste alphabétique d'espèces végétales. Il y a trois types d'entrées: le nom scientifique, le nom commun et le synonyme scientifique. Noms communs et synonymes renvoient aux noms scientifiques, où figurent les informations CITES.

Nom scientifique

La Liste contient, dans l'ordre alphabétique, tous les taxons animaux et végétaux inscrits aux annexes CITES – à l'exception des orchidées de l'Annexe II, pour lesquelles seul le nom du genre est inscrit – *Cattleya* spp., par exemple.

- Présentation
- 1) Nom scientifique
 - 2) Noms communs en anglais (E), en espagnol (S) et en français (F), s'ils sont connus;

- 3) Symbole #1 à #8 s'il y a lieu (Voir *Interprétation ci-dessous*);
- 4) Annexe(s) I, II, III, auxquelles l'espèce est inscrite, ou "NC" pour signaler les taxons partiellement inscrits ou non inscrits aux annexes CITES¹. Certains taxons font l'objet d'une inscription scindée; cela signifie qu'ils sont inscrits en partie à une annexe et en partie à une autre. Lorsqu'un taxon est inscrit à la fois à l'Annexe I et à l'Annexe II, par exemple, il est signalé par "I/II". Parfois, seules certaines populations sont inscrites alors que d'autres ne sont pas couvertes par la Convention. Un taxon en partie inscrit à l'Annexe I et en partie non inscrit, par exemple, est signalé par "I/NC".
- 5) Pour la faune, famille en majuscules et code à deux lettres indiquant la classe à laquelle appartient l'espèce. Les codes suivants sont utilisés:

Ac = Actinopterygii
 Am = Amphibia
 An = Anthozoa
 Ar = Arachnida
 Av = Aves
 Bi = Bivalvia
 El = Elasmobranchii
 Ga = Gastropoda
 Hi = Hirudinoidea
 Hy = Hydrozoa
 In = Insecta
 Ma = Mammalia
 Re = Reptilia
 Sa = Sarcopterygii

Exemples	<i>Abeillia abeillei</i> : (E) Emerald-chinned hummingbird, (S) Colibrí barbiesmeralda, (F) Colibri d'Abeillé II TROCHILIDAE Av <i>Cattleya</i> spp. #7 I/II ORCHIDACEAE
----------	---

Nom commun

Quand ils sont connus, les noms communs en anglais, en espagnol et en français sont donnés pour référence.

Présentation	Le nom commun en anglais (E), en espagnol (S) ou en français (F) est suivi du nom scientifique. Il y a une seule entrée pour chaque nom commun: il y en a une pour "Aigle doré" mais pas pour "Doré, Aigle".
--------------	--

Exemples	Perroquets (F): PSITTACIFORMES spp. Slipper orchids (E): <i>Paphiopedilum</i> spp., <i>Phragmipedium</i> spp. Colibri d'Abeillé (F): <i>Abeillia abeillei</i>
----------	---

¹ Quelques espèces non inscrites aux annexes CITES ont été incluses pour information: deux espèces de Psittaciformes: *Melopsittacus undulatus* et *Nymphicus hollandicus*, et quatre espèces de Falconiformes: *Cathartes aura*, *Cathartes burrovianus*, *Cathartes melambrotus* et *Coragyps atratus*. Ce sont les seules espèces de ces grands ordres à ne pas être couvertes par la CITES. De même, *Aloe vera* est la seule espèce d'*Aloe* non inscrite aux annexes.

Synonyme scientifique

Certains synonymes de noms scientifiques apparaissent dans la liste mais pas tous.

Présentation Synonyme scientifique suivi de "=" puis du nom scientifique accepté. C'est ce dernier qu'il faut chercher, en suivant l'ordre alphabétique, pour trouver les autres renseignements sur l'espèce.

Exemple *Tirucallia goetzei = Euphorbia goetzei*

Annexes et réserves CITES annotées (CD-ROM uniquement)

Des informations sont fournies sur tous les taxons actuellement ou antérieurement inscrits aux annexes CITES. La date de l'inscription originale est indiquée pour tous les taxons (ordre, famille, genre, espèce, sous-espèce) et les populations spécifiquement nommés dans les annexes actuelles ou dans des versions antérieures. Toutes les réserves faites par les Parties sont signalées avec la date d'entrée en vigueur et, dans le cas de réserves passées, la date de retrait.

Les informations sont disposées en suivant l'ordre taxonomique et incluent les noms communs pour les taxons supérieurs. Exemple: URSIDAE (ours). Lorsqu'il n'y a qu'une seule ou quelques espèces d'une famille qui sont inscrites, leurs noms communs sont indiqués. Exemple: ESCHRICHTIIDAE (baleine grise). Ces noms communs et noms de famille sont inclus dans l'index.

Remarque: Il y a dans la Liste plus de noms communs d'espèces en anglais, en espagnol et en français donnés au niveau du nom scientifique correspondant et du nom de famille approprié qu'il n'y en a dans les annexes annotées. Pour trouver podocnémide de Duméril, par exemple, consultez d'abord la Liste, où vous trouverez ce nom sous *Peltocephalus dumeriliana*. Cherchez ensuite *Peltocephalus dumeriliana* dans les annexes annotées.

Des informations sont fournies dans les cinq colonnes suivantes: Nom scientifique, Annexe CITES, Code ISO, Dates et Notes, comme suit:

Nom scientifique

Cette colonne donne le nom scientifique des taxons qui sont, ou ont été, inscrits aux annexes. Ces noms peuvent être situés à divers niveaux taxonomiques: ordre, famille, genre, espèce, sous-espèce ou variété. Les ordres et les familles sont donnés dans la même séquence taxonomique que celle utilisée dans les annexes CITES. Les espèces (et les sous-espèces) sont indiquées par ordre alphabétique dans chaque famille. Les noms des taxons supérieurs, figurant en caractères gras, sont communiqués pour information.

Annexe CITES

Dans les trois colonnes suivantes figurent la ou les annexes auxquelles les taxons sont ou étaient inscrits. Les réserves faites par les Parties sont signalées en ajoutant "r" au numéro de l'annexe pour indiquer que la réserve est entrée en vigueur, ou "w" pour indiquer qu'elle a été retirée. Si les Annexes I et II sont toutes deux applicables à un taxon à une certaine date, l'Annexe I est indiquée en premier. La mention "Del" remplaçant un numéro d'annexe dans une des trois colonnes signale que le taxon a été supprimé de l'annexe à la date indiquée.

Code ISO

Cette colonne donne le code ISO de toute Partie et de tout territoire mentionné dans le contexte d'une inscription à l'Annexe III, des réserves et des espèces faisant l'objet d'une inscription scindée ou partielle.

FI	Finlande	NG	Nigéria	ZM	Zambie
FR	France	NL	Pays-Bas	ZW	Zimbabwe
GB	Royaume-Uni	NO	Norvège		

Dates

Cette colonne donne les dates d'entrée en vigueur des changements survenus dans les annexes concernant l'espèce en question. Les dates sont indiquées dans l'ordre chronologique (jour/mois/année; exemple: 01/07/75 = 1^{er} juillet 1975), la date la plus ancienne étant citée la première. Les inscriptions ultérieures d'un taxon ou d'une population figurent aux lignes suivantes. Lorsque les populations d'un taxon sont scindées entre l'Annexe I et l'Annexe II, les deux annexes sont indiquées après chaque date à laquelle un changement a eu lieu, avec des notes indiquant le statut de toutes les populations à chaque annexe.

Notes

La dernière colonne contient toute information supplémentaire, par exemple sur les changements et la situation après chaque changement. Pour les populations isolées, le déroulement des faits est indiqué de manière que tout changement d'annexe peut être repéré en lisant les lignes se référant à chaque changement. Les références aux populations sont indiquées par le code ISO à deux lettres des pays ou territoires (voir plus haut). D'autres notes donnent des informations complémentaires sur les taxons inscrits (synonymes scientifiques, par exemple). Les mots "inclus dans..." indiquent que le taxon a d'abord été inscrit séparément puis englobé dans un taxon supérieur. Les mots "inscrit sous..." indiquent que le taxon faisait d'abord partie d'un taxon supérieur inscrit puis a été traité séparément, soit qu'il ait été transféré à une autre annexe, ou qu'il ait fait l'objet d'une réserve.

Voici un exemple: si l'on examine les différentes étapes de l'inscription aux annexes de la population de *Crocodylus niloticus* du Malawi, l'on constate que la première entrée pour cette espèce indique que l'espèce entière (toutes ses populations) a été inscrite à l'Annexe I le 1^{er} juillet 1975. On trouve ensuite, sous cette entrée, un certain nombre d'autres entrées indiquant le transfert de diverses populations de l'Annexe I à l'Annexe II. L'une d'elles signale que la population du Malawi (MW) a été transférée à l'Annexe II le 1^{er} août 1985. Une autre indique que le 18 janvier 1990, un programme d'élevage en ranch d'espèces de l'annexe II a commencé pour cette espèce; la dernière entrée résume la situation actuelle de l'espèce et indique que la population de *C. niloticus* du Malawi élevée en ranch est toujours inscrite à l'Annexe II.

Clé aux annotations

I	=	inscrite à l'Annexe I	spp.	=	toutes les espèces d'un taxon supérieur
II	=	inscrite à l'Annexe II	ssp.	=	sous-espèce

p.e.	=	peut-être éteinte	#1-#8	=	renvoi à <i>Interprétation</i> (voir ci-dessous)
popn(s)	=	population(s)			
r	=	réserve faite par la Partie nommée			

Interprétation

Conformément aux dispositions de l'Article I, paragraphe b, alinéa iii), de la Convention, le signe (#) suivi d'un nombre placé après le nom d'une espèce ou d'un taxon supérieur inscrit à l'Annexe II ou à l'Annexe III sert à désigner des parties ou produits obtenus à partir de cette espèce ou de ce taxon et qui sont mentionnés comme suit aux fins de la Convention:

- #1 Sert à désigner toutes les parties et tous les produits, sauf les graines, les spores et le pollen (y compris les pollinies);
 - a) les cultures de plantules ou de tissus obtenues *in vitro* en milieu solide ou liquide et transportées en conteneurs stériles; et
 - b) les fleurs coupées des plantes reproduites artificiellement.
- #2 Sert à désigner toutes les parties et tous les produits, sauf:
 - a) les graines et le pollen;
 - b) les cultures de plantules ou de tissus obtenues *in vitro* en milieu solide ou liquide et transportées en conteneurs stériles;
 - c) les fleurs coupées des plantes reproduites artificiellement; et
 - d) les produits chimiques et les produits pharmaceutiques finis.
- #3 Sert à désigner les racines entières et tranchées et les parties de racines, à l'exception des parties et produits transformés tels que poudres, pilules, extraits, toniques, tisanes et autres préparations.
- #4 Sert à désigner toutes les parties et tous les produits, sauf:
 - a) les graines, sauf celles des cactus mexicains provenant du Mexique, et le pollen;
 - b) les cultures de plantules ou de tissus obtenues *in vitro* en milieu solide ou liquide et transportées en conteneurs stériles;
 - c) les fleurs coupées des plantes reproduites artificiellement;
 - d) les fruits, et leurs parties et produits, des plantes acclimatées ou reproduites artificiellement; et
 - e) les éléments de troncs (raquettes), et leurs parties et produits, de plantes du genre *Opuntia* sous-genre *Opuntia* acclimatées ou reproduites artificiellement.
- #5 Sert à désigner les grumes, les bois sciés et les placages.
- #6 Sert à désigner les grumes, les bois sciés, les placages et les contreplaqués.
- #7 Sert à désigner les grumes, les copeaux et les matériaux déchiquetés non transformés.
- #8 Sert à désigner toutes les parties et tous les produits, sauf:
 - a) les graines et le pollen (y compris les pollinies);
 - b) les cultures de plantules ou de tissus obtenues *in vitro* en milieu solide ou liquide et transportées en conteneurs stériles;
 - c) les fleurs coupées des plantes reproduites artificiellement; et
 - d) les fruits, et leurs parties et produits, de plantes du genre *Vanilla* reproduites artificiellement.

Nomenclature and taxonomy

The nomenclature and taxonomy followed here are the same as for the CITES Appendices. In most cases where the Appendices list only the name of an order, family or genus, the names of the individual species in that higher taxon have been included in this Checklist. Where a standard reference has been adopted by the Nomenclature Committee [CoP12 Doc. 10.3 (Rev. 1) Annex 3] the names of those species follow the relevant publications below. However, species lists are not included for Orchidaceae spp. listed in Appendix II and the *CITES Orchid Checklists* (Roberts *et al.* 1995, 1997, 2001) should be consulted for those names at species or lower levels. Where no standard reference has been adopted (as noted in the appropriate places below) the names of species in higher taxa are those currently used in the UNEP-WCMC database and have been extracted from a number of publications.

The Conference of the Parties to CITES has adopted this Checklist as the standard reference for species included in the Appendices to the extent that it is accepted by the Nomenclature Committee. Therefore, it should be noted that the Nomenclature Committee has only accepted the scientific names of species in the standard references listed below. The two references for invertebrates have not been adopted as standard references and are included for information only.

Nomenclatura y taxonomía

La nomenclatura y la taxonomía seguidas aquí son las utilizadas en los Apéndices de la CITES. En la mayoría de los casos en que en los Apéndices se cita únicamente el nombre de un orden, familia o género, los nombres de las especies es ese taxón superior se han incluido en esta Lista. Cuando el Comité de Nomenclatura ha adoptado una referencia normalizada [CoP12 Doc. 10.3 (Rev. 1), Anexo 3] los nombres de esas especies son los utilizados en las correspondientes publicaciones que figuran a continuación. Sin embargo, no se incluyen las listas de especies para Orchidaceae spp. que figuran en el Apéndice II; los nombres a nivel de especie o niveles inferiores pueden encontrarse consultando la Lista de Orquídeas CITES (Roberts *et al.* 1995, 1997, 2001). Cuando no se haya adoptado una referencia normalizada (como se indica a continuación) los nombres de las especies de un taxa superior son los utilizados normalmente en la base de datos del UNEP-WCMC, que se han extraído de diversas publicaciones.

La Conferencia de las Partes en la CITES adoptó esta Lista como la referencia normalizada para las especies incluidas en los Apéndices en la medida en que ha sido aceptada por el Comité de Nomenclatura. En consecuencia, cabe señalar que el Comité de Nomenclatura sólo ha aceptado los nombres científicos de las especies en las referencias normalizadas que figuran a continuación. Las dos referencias para los invertebrados no han sido adoptadas como referencias normalizadas y se incluyen únicamente a título informativo.

Nomenclature et taxonomie

La nomenclature et la taxonomie suivies ici sont celles utilisées dans les annexes CITES. Dans la plupart des cas où les annexes n'incluent que le nom d'un ordre, d'une famille ou d'un genre, les noms des espèces individuelles de ce taxon supérieur ont été inclus dans la Liste. Lorsqu'une référence normalisée a été adoptée par le Comité de la nomenclature [CoP12 Doc. 10.3 (Rev. 1) Annexe 3], les noms de ces espèces sont ceux utilisés dans les publications pertinentes signalées ci-dessous. Toutefois, les listes d'espèces ne sont pas incluses pour Orchidaceae spp. figurant à l'Annexe II; ces noms au niveau de l'espèce ou à un niveau inférieur peuvent être trouvés en consultant les Listes CITES des Orchidaceae (Roberts *et al.* 1995, 1997, 2001). Lorsqu'aucune référence normalisée n'a été adoptée (comme signalé ci-dessous aux endroits appropriés) les noms d'espèces de taxons supérieurs sont ceux actuellement utilisés dans la base de données du PNUE-WCMC et proviennent de diverses publications.

La Conférence des Parties à la CITES a adopté cette Liste comme référence normalisée pour les espèces inscrites aux annexes dans la mesure où elle a été acceptée par le Comité de la nomenclature. Il convient donc de noter que le Comité de la nomenclature n'a accepté que les noms scientifiques des espèces figurant ci-après dans les références normalisées. Les deux références relatives aux invertébrés n'ont pas été adoptées comme références normalisées; elles ont été incluses ici pour information.

 Wurrup (E): *Lagorchestes hirsutus*
Xanthopsar flavus = *Agelaius flavus*
 Xantus's Hummingbird (E): *Basilornis xantusii*
Xenoboa cropanii = *Corallus cropanii*
Xenochrophis flavipunctatum = *Xenochrophis piscator*
Xenochrophis piscator : (E) Asiatic Water Snake,
 Chequered Keelback, Common Scaled Water Snake,
 Fishing Snake, Rice Paddy Snake, (F) Couleuvre à
 damier, Couleuvre aquatique, Couleuvre d'eau
 asiatique, Couleuvre pêcheuse, Serpent aquatique
 caréné à damier **III** COLUBRIDAE Re
Xenoglaux loweryi : (E) Long-whiskered Owllet, (S) Búho
 pequeño de bigotes alargados, Mochuelo peludo, (F)
 Chevêchette nimbée, **II** STRIGIDAE Av
Xerobates agassizii = *Gopherus agassizii*
Xerobates berlandieri = *Gopherus berlandieri*
Xeromys myoides : (E) False Swamp Rat, False Water Rat,
 (S) Falsa rata de agua, Rata bastarda de agua, (F) Faux
 rat d'eau, **I** MURIDAE Ma
Xipholena atropurpurea : (E) White-winged Cotinga, (S)
 Cotinga aliblanca, (F) Cotinga à ailes blanches,
 Cotinga porphyron, **I** COTINGIDAE Av
 Yacaré (S): *Caiman yacare*
 Yacare Caiman (E): *Caiman yacare*
 Yacaré de hocico ancho (S): *Caiman latirostris*
 Yacaré overo (S): *Caiman latirostris*
 Yack sauvage (F): *Bos mutus*
 Yaco (S): *Psittacus erithacus*
 Yacutinga cariazul (S): *Pipile pipile*
 Yacutingá frentinegra (S): *Pipile jacutinga*
 Yaguoso cariblanco (S): *Dendrocygna viduata*
 Yaguar (S): *Panthera onca*
 Yaguareté (S): *Panthera onca*
 Yaguarundi (S): *Herpailurus yaguarondi*
 Yaguoso colorado (S): *Dendrocygna bicolor*
 Yak (S): *Bos mutus*
 Yak salvaje (S): *Bos mutus*
 Yallara (E): *Macrotis leucura*
 Yangtze River Dolphin (E): *Lipotes vexillifer*
 Yangtze Sturgeon (E): *Acipenser dabryanus*
 Yarrell's Curassow (E): *Crax globulosa*
 Yellow Anaconda (E): *Eunectes notaeus*
 Yellow Baboon (E): *Papio hamadryas*
 Yellow Blossom (E): *Epioblasma florentina*
 Yellow Cardinal (E): *Gubernatrix cristata*
 Yellow Land Lizard (E): *Varanus flavescens*
 Yellow Mantella (E): *Mantella crocea*
 Yellow Monitor (E): *Varanus flavescens*
 Yellow Pencil Coral (E): *Madracis mirabilis/ Madracis myriaster*
 Yellow Pond Turtle (E): *Mauremys mutica*
 Yellow Riffleshell (E): *Epioblasma florentina*
 Yellow Roseella (E): *Platycercus flaveolus*
 Yellow Scroll Coral (E): *Turbinaria reniformis*
 Yellow Seahorse (E): *Hippocampus erectus/ Hippocampus kuda*
 Yellow Tortoise (E): *Indotestudo elongata*
 Yellow Tree Boa (E): *Epicrates inornatus*
 Yellow-and-green Lorikeet (E): *Trichoglossus flavoviridis*
 Yellow-backed Duiker (E): *Cephalophus silvicultor*
 Yellow-backed Lory (E): *Lorius garrulus*
 Yellow-backed Weaver (E): *Ploceus melanocephalus*
 Yellow-backed Whydah (E): *Euplectes macrourus*
 Yellow-banded Poison Frog (E): *Dendrobates leucomelas*
 Yellow-bellied Green-Pigeon (E): *Treron waalia*
 Yellow-bellied Poison Frog (E): *Minyobates fulgoritus*
 Yellow-bellied Weasel (E): *Mustela kathiah*
 Yellow-bibbed Lory (E): *Lorius chlorocercus*
 Yellow-billed Amazon (E): *Amazona collaria*
 Yellow-billed Cardinal (E): *Paroaria capitata*
 Yellow-billed Kite (E): *Milvus migrans*
 Yellow-billed Lorikeet (E): *Neopsittacus musschenbroekii*
 Yellow-billed Parrot (E): *Amazona collaria*
 Yellow-billed Tragopan (E): *Tragopan caboti*
 Yellow-billed Turaco (E): *Tauraco macrorhynchus*
 Yellow-blossom Pearly Mussel (E): *Epioblasma florentina*
 Yellow-bordered Tortoise (E): *Gopherus flavomarginatus*
 Yellow-breasted Bird-of-paradise (E): *Loboparadisea sericea*
 Yellow-breasted Racquet-tail (E): *Prioniturus flavicans*
 Yellow-capped Pygmy-Parrot (E): *Micropsitta keiensis*
 Yellow-capped Weaver (E): *Ploceus preussi*
 Yellow-chevroned Parakeet (E): *Brotogeris chiriri*
 Yellow-collared Lovebird (E): *Agapornis personatus*
 Yellow-collared Macaw (E): *Propyrrhura auricollis*
 Yellow-crested Cockatoo (E): *Cacatua sulphurea*
 Yellow-crowned Amazon (E): *Amazona ochrocephala*
 Yellow-crowned Bishop (E): *Euplectes afer*
 Yellow-crowned Parakeet (E): *Cyanoramphus auriceps*
 Yellow-crowned Parrot (E): *Amazona ochrocephala*
 Yellow-eared Conure (E): *Ognorhynchus icterotis*
 Yellow-eared Parrot (E): *Ognorhynchus icterotis*
 Yellow-faced Amazon (E): *Amazona xanthops*
 Yellow-faced Parrot (E): *Amazona xanthops*
 Yellow-faced Parrotlet (E): *Forpus xanthops*
 Yellow-faced Siskin (E): *Carduelis yarrellii*
 Yellow-footed Tortoise (E): *Geochelone denticulata*
 Yellow-fronted Amazon (E): *Amazona ochrocephala*
 Yellow-fronted Canary (E): *Serinus mozambicus*
 Yellow-fronted Kakariki (E): *Cyanoramphus auriceps*
 Yellow-fronted Parakeet (E): *Cyanoramphus auriceps*
 Yellow-fronted Parrot (E): *Poicephalus flavifrons*
 Yellow-green Chameleon (E): *Calumma malthe*
 Yellow-headed Amazon (E): *Amazona ochrocephala oratrix*
 Yellow-headed Box Turtle (E): *Cuora aurocapitata*
 Yellow-headed Caracara (E): *Milvago chimachima*
 Yellow-headed Parakeet (E): *Aratinga jandaya*
 Yellow-headed Parrot (E): *Amazona ochrocephala oratrix*
 Yellow-headed Rockfowl (E): *Picathartes gymnocephalus*
 Yellow-headed Sideneck (E): *Podocnemis unifilis*
 Yellow-headed Temple Turtle (E): *Hieremys annandalii*
 Yellow-headed Tortoise (E): *Indotestudo elongata*
 Yellowish-breasted Racquet-tail (E): *Prioniturus flavicans*
 Yellow-knobbed Curassow (E): *Crax daubentoni*
 Yellow-legged Owllet (E): *Glaucidium tephronotum*
 Yellow-lored Amazon (E): *Amazona xantholora*
 Yellow-lored Parrot (E): *Amazona xantholora*
 Yellow-mantled Weaver (E): *Ploceus tricolor*
 Yellow-mantled Whydah (E): *Euplectes macrourus*
 Yellow-mantled Widowbird (E): *Euplectes macrourus*
 Yellow-margined Box Turtle (E): *Cuora flavomarginata*
 Yellow-naped Amazon (E): *Amazona ochrocephala europalliata*
 Yellow-naped Parrot (E): *Amazona ochrocephala europalliata*
 Yellow-shouldered Amazon (E): *Amazona barbadensis*
 Yellow-shouldered Parrot (E): *Amazona barbadensis*
 Yellow-shouldered Widowbird (E): *Euplectes macrourus*
 Yellow-spotted River Turtle (E): *Podocnemis unifilis*
 Yellow-spotted Sideneck Turtle (E): *Podocnemis unifilis*
 Yellow-streaked Lory (E): *Chalcopsitta scintillata*
 Yellow-striped Poison Frog (E): *Dendrobates truncatus*
 Yellow-tailed Black-Cockatoo (E): *Calyptorhynchus funereus*
 Yellow-tailed Woolly Monkey (E): *Lagothrix flavicauda*
 Yellow-throated Caracara (E): *Daptrius ater*
 Yellow-throated Day Gecko (E): *Phelsuma flavigularis*
 Yellow-throated Hanging-Parrot (E): *Loriculus pusillus*
 Yellow-throated Marten (E): *Martes flavigula*
 Yellow-winged Pytilia (E): *Pytilia hypogrammica*
 Yemen Monitor (E): *Varanus yemenensis*
 Youyou (F): *Poicephalus senegalus*
 Yucatan Parrot (E): *Amazona xantholora*
 Yucatan Rusty-rumped Tarantula (E): *Brachypelma epicureanum*
 Yungas Pygmy-Owl (E): *Glaucidium bolivianum*
 Yunnan Box Turtle (E): *Cuora yunnanensis*
 Yunnan Snub-nosed Monkey (E): *Pygathrix bieti*

Cotylolabium = *Stenorhynchos*
Covill's barrel cactus (E): *Ferocactus emoryi*
Cranichis spp.: #7 II ORCHIDACEAE
Cremastra spp.: #7 II ORCHIDACEAE
Crepidium = *Malaxis*
Cribbia spp.: #7 II ORCHIDACEAE
Crimson pitcherplant (E): *Sarracenia leucophylla*
Crinonia = *Pholidota*
Criogenes = *Cypripedium*
Criosanthes = *Cypripedium*
Cristóbal (S): *Platymiscium pleiostachyum*
Crocodeilanthe = *Pleurothallis*
Crossangis = *Diaphananthe*
Crown of thorns (E): *Euphorbia milii* var. *miliiflora* / *Euphorbia milii*
var. *splendens*
Crybe spp.: #7 II ORCHIDACEAE
Cryptanthemis = *Rhizanthella*
Cryptarrhena spp.: #7 II ORCHIDACEAE
Cryptocentrum spp.: #7 II ORCHIDACEAE
Cryptocereus anthonyanus = *Selenicereus anthonyanus*
Cryptochilus spp.: #7 II ORCHIDACEAE
Cryptoglossa = *Podochilus*
Cryptophoranthus = *Pleurothallis*
Cryptopus spp.: #7 II ORCHIDACEAE
Cryptopylos spp.: #7 II ORCHIDACEAE
Cryptosanthes = *Leochilus*
Cryptostylis spp.: #7 II ORCHIDACEAE
Ctenitis gomezii = *Cyathea excelsa*
Ctenorchis = *Angraecum*
Cuban mahogany (E): *Swietenia mahagoni*
Cuculina = *Catasetum*
Cuitlauzina spp.: #7 II ORCHIDACEAE
Cumarinia odorata = *Coryphantha odorata*
Cumulopuntia berteri = *Opuntia sphaerica*
Cumulopuntia boliviiana = *Opuntia chichensis*
Cumulopuntia crassicylindrica = *Opuntia crassicylindrica*
Cumulopuntia echinacea = *Opuntia boldinghii*

How to use the pdf version of the *Checklist of CITES Species* and the *Annotated CITES Appendices and Reservations*

Accessing the document

This CD-ROM is designed to self-launch, that is it will automatically open itself after you have inserted it in your CD-ROM drive. However if you have closed the pdf file and wish to re-open it, you can go to the CD-ROM drive on your file manager and click on the file “open.bat”.

Navigating through the document

To head straight for the *Checklist of CITES Species* and the *Annotated CITES Appendices and Reservations* on the CD-ROM, click on the hyperlink (in blue) above or on the one at the bottom of this page. Clicking on either of these links will take you directly to the contents page.

You can use a number of methods to navigate between the different sections.

Firstly, as explained above, you can use the hyperlinks that appear in blue in the various contents pages. Clicking on those will take you to the relevant section.

Secondly, there is a page counter at the bottom of the screen allowing you to go to the next or previous page, to the page number of your choice or to the first or last page of the file. The top toolbar also comprises a set of arrows which offers similar possibilities to navigate through the file, e.g. taking you to the next page, previous page visited, last page, etc.

Thirdly, the Adobe Reader includes a ‘Find’ facility. This can be accessed via the pull-down Edit menu, by pressing <Ctrl-F> simultaneously, or by clicking on the icon showing binoculars. Type in the Find caption box the text you wish to search for then click ‘Find’. This will cause the Adobe Reader to go to and highlight the next occurrence of the text in the checklist. To find any further entries of the term you have typed in, you can simply right-click on the document and then left-click on ‘Find again’ on the menu thus produced.

Como usar la version pdf de la *Lista de EspeciesCITES y los Apéndices y Reservas Anotadas de la CITES*

Para abrir el documento

Este CD-ROM esta diseñado para auto iniciarse. Esto significa que se abre automaticamente después de que usted ha insertado el CD-ROM. Sin embargo, si usted ha cerrado el archivo pdf y desea reabrirlo, usted puede ir al folder del CD-ROM en su administrador de archivos, y dar un *click* doble en el archivo ‘open.bat’.

Para navegar a la pagina de contenido

Para ir directo a las Listas de Espcies y los Apéndices y Reservas Anitadas de la CITES en el CD-ROM, dé un *click* en uno de los hipervínculos (en azul) al inicio o al final de esta página. Estos vinculos conducen directamente a la página de contenido.

Usted puede usar varios métodos para navegar entre secciones.

Primero, como ha sido indicado arriba, usted puede usar los hipervínculos que aparecen en azul en las páginas con los índices. Al dar un click sobre el texto en azul, su patalla será transferida a la sección relevante.

Segundo, hay un contador de páginas al final de la pantalla, el cual le permite ir a las página siguiente, a la página previa, a la página cuyo número usted indique, o a la primera o la última páginas en el archivo. La barra de herramientas en la parte alta de su pantalla contiene también un conjunto de flechas que le ofrecen posibilidades similares de navegacion en el archivo (por ejemplo, ir a la página siguiente, la página previa, la última página, etc.)

Tercero, puede usar la función de ‘Búsqueda’ que se encuentra en la lista plegable de comandos de edición. Esta función también puede ser usada si usted presiona las teclas <Ctrl-F> simultáneamente, o bien dando un click en el ícono con los binoculares. Teclée en la ventana que aparecerá el texto que desea encontrar y entonces dé un click en el botón ‘Buscar’. Esto le llevará al primer punto en el libro donde se encuentra la expresión indicada, al cual aparecerá iluminada. Para encontrar otras partes del libro dónde la expresión esté presente, simplemente dé un click en el botón ‘Busca más’.

Comment utiliser la version pdf de la *Liste des espèces CITES et des Annexes et réserves CITES annotées*

Comment accéder au document

Ce CD-ROM se met automatiquement en marche une fois inséré dans votre lecteur de CD-ROM. Cependant, si vous avez fermé le fichier pdf et souhaitez le rouvrir, vous pouvez aller dans le lecteur de CD-ROM sous votre gestionnaire de fichiers et cliquez sur le fichier "open.bat".

Naviguer dans le document

Pour arriver directement sur la Liste des espèces CITES et des Annexes et réserves CITES annotées sur le CD-ROM, cliquez ci-dessus sur l'hyperlien en bleu ou sur celui figurant au bas de cette page. En cliquant sur l'un ou l'autre de ces deux liens, vous arriverez directement à la table des matières.

Il y a plusieurs manières de naviguer entre les différentes sections.

Premièrement, comme expliqué ci-dessus, vous pouvez utiliser les hyperliens qui apparaissent en bleu dans les diverses tables des matières. Cliquer dessus vous amènera à la section recherchée.

Deuxièmement, il y a au bas de l'écran un compteur de pages qui vous permet d'aller à la page suivante ou précédente, à la page de votre choix, ou encore à la première ou dernière page du fichier. La barre d'outils du haut comporte une série de flèches qui offrent des possibilités de navigation similaires: elles peuvent vous emmener à la page suivante ou précédente, à la dernière page consultée, à la dernière page du document, etc.

Troisièmement, Adobe Acrobat inclut une fonction de recherche. On peut y accéder par le menu déroulant "Edition", en appuyant simultanément sur les touches <Ctrl> et <F>, ou encore en cliquant sur l'icône représentant des jumelles. Tapez les mots recherchés dans la case prévue sous "Rechercher" puis cliquez sur "Rechercher". Adobe Acrobat s'arrêtera sur la première occurrence de ces mots à partir du point de recherche et les mettra en surbrillance. Pour relancer une recherche, il suffit de cliquer du bouton droit sur le document puis de cliquer du bouton gauche sur "Poursuivre la recherche".
